PharmD, JD, MBA, BCPS, CHC, CSSBB, DASPL*

Volunteering with CSHP, first as a Board member, and now as the incoming President, has been an incredibly rewarding experience that profoundly influenced my career. It has provided me with numerous opportunities to collaborate with like-minded professionals, share best practices, and advocate for the pharmacy profession at both the state and national levels. Through CSHP, I have developed a deeper understanding of the challenges and opportunities within our field, which has enabled me to be a more effective leader and advocate. Moreover, the relationships I have built through CSHP have been invaluable, providing me with a strong network of colleagues and mentors who continue to support and inspire me.

The pharmacy landscape is constantly evolving, and it is essential for us to stay ahead of the curve. As we navigate the complexities of healthcare, it is crucial to embrace innovation and advocate for policies that support the vital role of pharmacy professionals in patient care. My experiences with CSHP have reinforced the importance of continuous learning and adaptation in our profession. By staying informed about the latest developments and actively participating in professional organizations, we can ensure that we remain at the forefront of healthcare delivery.

Over the next three years, I look forward to collaborating with CSHP Board and members to drive innovation within the pharmacy profession and advocate for policies that enhance patient care through these initiatives:

Professional Development. Elevating pharmacists and pharmacy technicians through professional development initiatives such as leadership academy, pharmacy technician development program to effectively address workforce needs.

Technology. Technologies, including artificial intelligence (AI), are profoundly transforming the practice of pharmacy by revolutionizing medication management and patient care. It is imperative for pharmacy professionals to be actively involved in decision-making processes, proactively shaping policies, and providing education and resources to our members and the public.

Together, we can make a meaningful impact and drive positive change in healthcare.
