

BRAIN, BEHAVIOR AND HEALTH: EMERGING RESEARCH

FRIDAY, FEBRUARY 22, 2019

Holiday Inn Yorkdale, Toronto ON

The Canadian Society of Medical Evaluators and the Canadian Academy of Psychologists in Disability Assessment are pleased to present a conference focused on the complex relations amongst the brain, behavior and health with Canadian researchers of international recognition.

Speakers include [Dr. Amir Minerbi](#), [Dr. Valerie Taylor](#), [Dr. Bobby Stojanoski](#) and [Dr. David Corey](#). Research regarding the bidirectional connection between the gut [microbiome and the brain](#) will be presented, including research results on the microbiome and fibromyalgia and on mental illness (psychobiotics), with implications for assessment and treatment.

We are also excited to have research presented from the lab of [Dr. Adrian Owen](#) regarding brain 'death' and [consciousness](#) www.theglobeandmail.com/life/health-and-fitness/health/neuroscientist-adrian-owen-recounts-his-decades-of-research-for-new-book/article35321685 and research regarding [fMRI](#) and [brain injury](#).

In addition to the above, lawyers will present complex cases involving both psychological and physical injuries, and discuss how the cases were viewed by the court.

Please stay tuned for detailed information regarding the above presentations and bios of the presenters.

CALL FOR ABSTRACTS

We are requesting submissions of **original research** that would fit within the parameters of brain, behavior and health. Please submit an abstract by **January 4, 2018** to: education@csme.org
