

A E C s

Applied Epidemiology Competencies

Partner organizations participating in the development of these competencies:

I. Skill Domain—Assessment and Analysis

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
A. Recognize public health problems pertinent to the population	A. Identify public health problems pertinent to the population	A. Ensure identification of public health problems pertinent to the population	A. Validate identification of public health problems pertinent to the population
1. Recognize the existence of a public health problem	1. Use critical thinking to determine whether a public health problem exists	1. Ensure that critical thinking is used to determine whether a public health problem exists	1. Synthesize key findings from the critical thinking process to determine whether a public health problem exists
<ul style="list-style-type: none"> a. List relevant data and information sources within and outside the public health system b. Seek assistance synthesizing existing data and information into a determination of expected and observed numbers of cases or outcomes in a population c. Seek assistance in determining threshold values (e.g., baseline disease burden, prevalence of risk behaviors) for public health action d. N/A e. N/A f. N/A 	<ul style="list-style-type: none"> a. Identify relevant data and information sources within and outside the public health system b. Synthesize existing data and information into a determination of expected and observed numbers of cases or outcomes in a population c. Determine threshold values (e.g., baseline disease burden, prevalence of risk behaviors) for public health action d. Conduct a thorough search of the scientific literature and public health databases using search engines and methods relevant to specific problems e. Quantify population-based health risks f. N/A 	<ul style="list-style-type: none"> a. Validate the relevance of data and information sources within and outside the public health system b. Verify the accuracy of expected and observed numbers of cases or outcomes in a population c. Ensure the accuracy of determined threshold values (e.g., baseline disease burden, prevalence of risk behaviors) for public health action d. Verify the completeness and accuracy of searches of literature and public health databases e. Verify population-based health risks f. Decide whether to obtain expertise outside the agency to assist in decision-making 	<ul style="list-style-type: none"> a. Use relevant data and information sources within and outside the public health system b. Synthesize existing data and information into a determination of expected and observed numbers of cases or outcomes in a population c. Validate the calculated threshold values (e.g., baseline disease burden, prevalence of risk behaviors) for public health action d. Synthesize results of searches of the scientific literature and public health databases e. Verify population-based health risks f. Determine whether additional outside expertise is needed to assist in decision-making
2. N/A	2. Articulate the need for further investigation or other public health action on the basis of results of literature review and assessment of current data	2. Decide whether to conduct further investigation or other public health action on the basis of results of literature review and assessment of current data	2. Evaluate need for further investigation or other public health action on the basis of results of literature review and assessment of current data
3. Collaborate with others inside and outside the agency to identify the problem	3. Collaborate with others inside and outside the agency to identify the problem and form recommendations	3. Lead collaborations with others inside and outside the agency to identify the problem and form recommendations	3. Lead collaborations with others inside and outside the agency to identify the problem and form recommendations

I. Skill Domain—Assessment and Analysis

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
B. Conduct surveillance activities	B. Conduct surveillance activities	B. Oversee surveillance activities	B. Organize surveillance
1. N/A	1. Design surveillance for the particular public health issue under consideration	1. Approve surveillance for the particular public health issue under consideration	1. Evaluate validity of conducting surveillance for the particular public health issue under consideration
a. N/A b. N/A c. N/A d. N/A e. N/A	a. Identify types of surveillance methods for specific public health problems b. Identify information system(s) to support surveillance systems c. Recommend types of surveillance systems for specific public health problems d. N/A e. Identify additional burden to public health system and reporting entity anticipated to result from the proposed surveillance system	a. Examine potential surveillance methods for specific public health problems b. Approve information system(s) to support surveillance systems c. Decide on types of surveillance systems for specific public health problems d. Review anticipated cost/benefit of initiating a new surveillance system e. Decide whether to impose the additional burden to public health system and reporting entity that is anticipated to result from the proposed surveillance system	a. Examine types of surveillance methods for specific public health problems b. Recommend information system(s) to support surveillance systems c. Determine type of surveillance systems for specific public health problems d. N/A e. Evaluate additional burden to public health system and reporting entity anticipated to result from the proposed surveillance system
2. Identify surveillance data needs	2. Identify surveillance data needs	2. Decide on surveillance data needs	2. Evaluate surveillance data needs
a. Create case definition(s) based on person, place, and time b. N/A c. N/A d. N/A e. N/A f. N/A g. Recognize potential uses of data to inform surveillance system h. N/A	a. Create case definition(s) based on person, place, and time b. Describe sources, quality, and limitations of surveillance data c. Define the data elements to be collected or reported d. Identify mechanisms to transfer data from source to public health agency e. Define timeliness required for data collection f. Determine frequency of reporting g. Describe potential uses of data to inform surveillance system design h. Define the functional requirements of the supporting information system	a. Verify case definition(s) based on person, place, and time b. Decide on sources of surveillance data c. N/A d. Decide on mechanisms to transfer data from source to public health agency e. Decide on acceptable timeliness for data collection and frequency for reporting f. N/A g. Decide on surveillance system design h. Approve the functional requirements of the supporting information system	a. Evaluate case definition(s) based on person, place, and time b. Evaluate sources, quality, and limitations of surveillance data c. Assess the adequacy of the data elements to be collected or reported d. Assess mechanisms to transfer data from source to public health agency e. Evaluate timeliness requirements for data collection f. Assess frequency of reporting g. Create surveillance system design on the basis of potential uses of data h. Assess the functional requirements of the information system

I. Skill Domain—Assessment and Analysis

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<p>3. Implement new or revise existing surveillance systems</p>	<p>3. Implement new or revise existing surveillance systems</p>	<p>3. Supervise or manage implementation of new or revision of existing surveillance systems</p>	<p>3. Implement new or revise existing surveillance systems</p>
<ul style="list-style-type: none"> a. Define objectives and uses of surveillance system b. Test data collection, data storage, and analytical methods as directed c. Assist in creating working surveillance system d. Collect data for verification of the defined surveillance system parameters (e.g., timeliness, frequency) e. Classify potential cases according to whether they meet the case definition f. Interview people with illness to solicit necessary information g. Assist in monitoring data quality h. Maintain good working relationships with reporting entities i. Provide feedback to reporting entities and other organizations or individuals who need to know about the data or system 	<ul style="list-style-type: none"> a. Define objectives and uses of surveillance system b. Test data collection, data storage, and analytical methods c. Create working surveillance system d. Verify that data collection occurs according to the defined surveillance system parameters (e.g., timeliness, frequency) e. Ensure correct classification of cases according to the case definition f. Interview people with illness to solicit necessary information g. Monitor data quality h. Create good working relationships with reporting entities i. Provide feedback to reporting entities and other organizations or individuals who need to know about the data or system 	<ul style="list-style-type: none"> a. Approve objectives and uses of surveillance system b. Validate data collection, data storage, and analytical methods c. N/A d. Verify that data collection occurs according to the defined surveillance system parameters (e.g., timeliness, frequency) e. N/A f. N/A g. Ensure that data quality is monitored h. Ensure good working relationships with reporting entities i. Ensure provision of feedback to reporting entities and other organizations or individuals who need to know about the data or system 	<ul style="list-style-type: none"> a. Develop guidelines for objectives and uses of surveillance systems b. Validate data collection, data storage, and analytical methods c. Create working surveillance system d. Assess performance of data collection systems against the defined surveillance system parameters (e.g., timeliness, frequency) e. N/A f. N/A g. Monitor data quality h. Create good working relationships with reporting entities i. Synthesize information about surveillance system for communicating to reporting entities and other organizations or individuals who need to know about the data or system

I. Skill Domain—Assessment and Analysis

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
4. Report key findings from the surveillance system	4. Identify key findings from the surveillance system	4. Synthesize key findings from the surveillance system and other pertinent information for use by decision-makers	4. Synthesize key findings from the surveillance system and other pertinent information for use by decision-makers
<ul style="list-style-type: none"> a. Provide system’s results to senior epidemiologists b. Recognize implications to public health programs c. Assist in developing conclusions from the surveillance data d. Communicate results to senior staff 	<ul style="list-style-type: none"> a. Examine system’s results in the context of current scientific knowledge b. Identify implications to public health programs c. Develop conclusions from the surveillance data d. Communicate results to agency managers and to reporters of surveillance data (see Communication competencies) 	<ul style="list-style-type: none"> a. Interpret system’s results in the context of current scientific knowledge and other available information b. Examine any implications to public health programs c. Determine relative priority of each conclusion from the surveillance data, before making recommendations to decision-makers d. Communicate synthesized information to decision-makers and the public 	<ul style="list-style-type: none"> a. Interpret system’s results in the context of current scientific knowledge b. Examine any implications to public health programs c. Determine relative priority of each conclusion from the surveillance data, before making recommendations to decision-makers d. Communicate synthesized information to decision-makers and the public
5. Support evaluation of surveillance systems	5. Conduct evaluation of surveillance systems	5. Ensure evaluation of surveillance systems	5. Design and conduct evaluation of surveillance systems
<ul style="list-style-type: none"> a. Collect data necessary for evaluation of surveillance systems using national guidance and methods* b. Assist in preparing recommendations for modifications to surveillance systems on the basis of evaluation c. N/A d. Assist in implementing changes to surveillance system on the basis of results of evaluation 	<ul style="list-style-type: none"> a. Evaluate surveillance systems using national guidance and methods* b. Propose recommendations for modifications to surveillance systems on the basis of evaluation c. N/A d. Implement changes to surveillance system on the basis of results of evaluation 	<ul style="list-style-type: none"> a. Ensure evaluation of surveillance systems using national guidance and methods* b. Appraise recommendations for modifications to surveillance systems on the basis of evaluation c. Decide whether to modify surveillance systems on the basis of recommendations d. Ensure that changes to surveillance system are implemented on the basis of results of evaluation 	<ul style="list-style-type: none"> a. Evaluate surveillance systems using national guidance and methods* b. Develop and/or review recommendations for modifications to surveillance systems on the basis of evaluation c. Decide whether to modify surveillance systems on the basis of recommendations d. Ensure that changes to surveillance system are implemented on the basis of results of evaluation

* See Centers for Disease Control and Prevention (US). Updated guidelines for evaluating public health surveillance systems; recommendations from the Guidelines Working Group. MMWR Recomm Rep 2001;50(RR-13):1–35.

I. Skill Domain—Assessment and Analysis

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<i>C. Identify acute and chronic conditions or other adverse outcomes in the population</i>	<i>C. Investigate acute and chronic conditions or other adverse outcomes in the population</i>	<i>C. Ensure investigation of acute and chronic conditions or other adverse outcomes in the population</i>	<i>C. Design investigation of acute and chronic conditions or other adverse outcomes in the population</i>
1. Assist in conducting a community health status assessment	1. Conduct a community health status assessment	1. Oversee a community health status assessment	1. Design a community health status assessment
2. N/A	2. Recommend priorities of potential public health problems to be addressed	2. Decide on priority of public health problems to be addressed	2. Recommend priorities of potential public health problems to be addressed
3. Characterize investigative processes	3. Select investigative processes	3. Approve selection of investigative processes	3. Determine investigative processes
<ul style="list-style-type: none"> a. Recognize different principles of investigation for endemic/sporadic illness or disease clusters vs. acute outbreaks b. List the major epidemiologic study designs, including the strengths and weaknesses of each 	<ul style="list-style-type: none"> a. Apply principles of investigation for endemic/sporadic illness or disease clusters vs. acute outbreaks b. Describe the major epidemiologic study designs, including the strengths and weaknesses of each 	<ul style="list-style-type: none"> a. Determine whether to use investigative methods for endemic/sporadic illness or disease clusters vs. acute outbreaks b. Decide which epidemiologic study design to use for the public health problem to be investigated 	<ul style="list-style-type: none"> a. Determine whether to use investigative methods for endemic/sporadic illness or disease clusters vs. acute outbreaks b. Integrate knowledge about epidemiologic study designs into study design for the public health problem to be investigated
4. Create hypotheses	4. Create hypotheses	4. Verify hypotheses	4. Verify hypotheses

I. Skill Domain—Assessment and Analysis

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
5. Assist in design of investigation (e.g., disease investigations, studies, or screening programs)	5. Assist in design of investigation (e.g., disease investigations, studies, or screening programs)	5. Oversee design of investigations (e.g., disease investigations, studies, or screening programs)	5. Design investigations (e.g., disease investigations, studies, or screening programs)
<ul style="list-style-type: none"> a. Identify target population for investigation b. N/A c. N/A d. Create case definition(s) e. N/A f. N/A g. N/A h. N/A i. N/A j. N/A 	<ul style="list-style-type: none"> a. Identify target population for investigation b. Perform power calculations if necessary c. Identify individuals or groups eligible to be in the study d. Create case definition(s) e. Identify time frame for investigation f. Select investigation design under existing constraints g. Identify possible sources of bias h. Identify methods to minimize potential sources of bias i. Identify potential confounders j. Design strategies to minimize or eliminate potential confounding 	<ul style="list-style-type: none"> a. Validate selection of target population for investigation b. Approve power calculations c. Approve inclusion of individuals or groups in the study d. Approve case definition(s) e. Approve time frame for investigation f. Approve investigation design that will be most effective under existing constraints g. N/A h. Approve methods to minimize potential sources of bias i. N/A j. Approve strategies to minimize or eliminate potential confounding 	<ul style="list-style-type: none"> a. Identify target population for investigation b. Evaluate results of power calculations c. Verify individuals or groups for inclusion in the study d. Create case definition(s) e. Verify time frame for investigation f. Justify investigation design under existing constraints g. Evaluate possible sources of bias h. Identify methods to minimize potential sources of bias i. Evaluate potential confounders j. Design strategies to minimize or eliminate potential confounding

I. Skill Domain—Assessment and Analysis

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
6. Conduct investigation as directed	6. Use investigation techniques consistent with the public health problem	6. Ensure use of investigation techniques consistent with the public health problem	6. Design investigation techniques consistent with the public health problem
<ul style="list-style-type: none"> a. Respond in a time frame consistent with the public health problem being investigated b. N/A c. Contact data sources d. Use methods for finding cases or other subjects suitable to the investigation e. Use data collection instruments that have been constructed for the investigation f. Use identified sampling methods g. Support necessary coordination among all groups involved in investigation 	<ul style="list-style-type: none"> a. Respond in a time frame consistent with the public health problem being investigated b. Apply methods and measures that are consistent with the particular type of investigation c. Identify sources of data for investigation d. Identify methods to find cases and other subjects suitable to the investigation e. Design data collection instruments using new or existing information systems f. Identify sampling methods given the context of the situation g. Organize necessary coordination among all groups involved in investigation 	<ul style="list-style-type: none"> a. Ensure that response is in a time frame consistent with the public health problem being investigated b. Ensure that methods and measures are consistent with the particular type of investigation c. Approve data sources for investigation d. Approve methods to find cases and other subjects e. Approve data collection instruments and supporting information systems f. Approve sampling methods given the context of the situation g. Ensure coordination among all groups involved in investigation 	<ul style="list-style-type: none"> a. Respond in a time frame consistent with the public health problem being investigated b. Recommend methods and measures that are consistent with the particular type of investigation c. Verify selection of data sources for investigation d. Verify selection of case finding methods e. Evaluate data collection instruments and supporting information systems f. Evaluate sampling methods given the context of the situation g. Organize necessary coordination among all groups involved in investigation

I. Skill Domain—Assessment and Analysis

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<i>D. Apply principles of good ethical/legal practice as they relate to study design and data collection, dissemination, and use</i>	<i>D. Apply principles of good ethical/legal practice as they relate to study design and data collection, dissemination, and use</i>	<i>D. Ensure study design and data collection, dissemination, and use follow ethical/legal principles</i>	<i>D. Synthesize principles of good ethical/legal practice for application to study design and data collection, dissemination, and use</i>
1. Follow ethics guidelines and principles when planning studies; conducting research; and collecting, disseminating, and using data	1. Follow ethics guidelines and principles when planning studies; conducting research; and collecting, disseminating, and using data	1. Examine ethics guidelines and principles when planning studies; conducting research; and collecting, disseminating, and using data	1. Integrate ethics guidelines and principles when planning studies; conducting research; and collecting, disseminating, and using data
<ul style="list-style-type: none"> a. Collect and use public health data, including individual identifiers, only with clearly identified justification b. Balance respect for people and individual privacy with the risk of the threat to the community c. Apply public health code of ethics to collection, management, dissemination, and use of data and information, including principles of justice, timeliness, and transparency of purpose[†] 	<ul style="list-style-type: none"> a. Collect and use public health data, including individual identifiers, only with clearly identified justification b. Balance respect for people and individual privacy with the risk of the threat to the community c. Apply public health code of ethics to collection, management, dissemination, and use of data and information, including principles of justice, timeliness, and transparency of purpose[†] 	<ul style="list-style-type: none"> a. Ensure that public health data, including individual identifiers, are collected and used only with clearly identified justification b. Balance respect for people and individual privacy with the risk of the threat to the community c. Ensure that public health code of ethics is applied to collection, management, dissemination, and use of data and information, including principles of justice, timeliness, and transparency of purpose[†] 	<ul style="list-style-type: none"> a. Collect and use public health data, including individual identifiers, only with clearly identified justification b. Balance respect for people and individual privacy with the risk of the threat to the community c. Apply public health code of ethics to collection, management, dissemination, and use of data and information, including principles of justice, timeliness, and transparency of purpose[†]
2. Apply relevant laws to data collection, management, dissemination, and use of data and information	2. Apply relevant laws to data collection, management, dissemination, and use of data and information	2. Communicate to staff legal expectations, limitations, and implications of collection, management, dissemination, and use of data and information	2. Design data collection, management, and dissemination and use of data and information to comply with relevant laws
3. N/A	3. Describe differences between public health practice and public health research	3. Obtain decision on whether investigation involves public health practice or public health research	3. Verify conclusions that have been reached regarding distinction between public health practice and public health research
4. Describe human subjects research	4. Describe human subjects research	4. Ensure legal and ethical conduct of human subjects research	4. Ensure legal and ethical conduct of human subjects research
5. Apply Institutional Review Board processes as directed	5. Apply Institutional Review Board processes as necessary	5. Ensure application of necessary Institutional Review Board processes	5. Ensure application of Institutional Review Board processes

Determine whether rates and age adjustments are needed, and perform analyses as necessary c. Formulate a synopsis of the data using standard epidemiologic measures, including sensitivity, specificity, positive predictive value, incidence, prevalence, and attributable fraction d. Determine best methodology for and perform trend analyses e. Analyze using measures of association (e.g., relative risks and odds ratios), confidence intervals, and p-values f. Interpret measures of association, confidence intervals, and p-values g. Evaluate using multivariate and/or regression analyses as necessary h. Perform multivariable and/or regression analyses as necessary i. Verify results and interpretation of data analysis j. Assess the effect of potential confounders k. Assess whether effect modification is present l. Create standard epidemiology report and necessary components, including tables and graphs m. N/A

I. Skill Domain—Assessment and Analysis

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<i>G. Summarize results of the analysis, and draw conclusions</i>	<i>G. Summarize results of the analysis, and draw conclusions</i>	<i>G. Evaluate conclusions and interpretations from investigation</i>	<i>G. Evaluate results of the analysis, and interpret conclusions</i>
1. N/A	1. Apply knowledge of epidemiologic principles and methods to make recommendations regarding the validity of epidemiologic data	1. Assess the validity of the epidemiologic data, taking into consideration bias and other study limitations	1. Assess the validity of the epidemiologic data, taking into consideration bias and other study limitations
<ul style="list-style-type: none"> a. N/A b. N/A c. N/A d. N/A e. Distinguish between statistical association and causal effect f. N/A 	<ul style="list-style-type: none"> a. Determine likely sources of bias b. Assess validity and reliability of data collection instruments and methods c. Determine other limitations in study design, sample selection, data collection, analysis, and other features d. Recognize the limitations of significance testing e. Make causal inferences on the basis of principles of causation (e.g., strength, consistency, biological plausibility, dose-response, and temporal relationship) f. Examine the influence of power and confidence limits on the interpretation of the study’s data 	<ul style="list-style-type: none"> a. N/A b. N/A c. N/A d. N/A e. Evaluate causal inferences on the basis of principles of causation (e.g., strength, consistency, biological plausibility, dose-response, and temporal relationship) f. N/A 	<ul style="list-style-type: none"> a. Confirm likely sources of bias and likely effects on results b. Verify the selection of data collection instruments and methods on the basis of their validity and reliability c. Confirm other limitations in study design, sample selection, data collection, analysis, and other features d. Explain the limitations of significance testing e. Evaluate causal inferences on the basis of principles of causation (e.g., strength, consistency, biological plausibility, dose-response, and temporal relationship) f. Explain the influence of power and confidence limits on the interpretation of the study’s data
2. N/A	2. Assess need for special analyses, including survival analyses, cost-effectiveness/cost benefit/cost utility analyses	2. Assess need for special analyses, including survival analyses, cost-effectiveness/cost benefit/cost utility analyses	2. Assess need for special analyses, including survival analyses, cost-effectiveness/cost benefit/cost utility analyses
a. N/A	a. N/A	a. N/A	a. Formulate special analyses as necessary, including survival analyses, cost-effectiveness/cost benefit/cost utility analyses

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
2. N/A	2. Use scientific evidence in preparing recommendations for action or interventions	2. Ensure that scientific evidence is used in preparing recommendations for action or interventions	2. Design recommendations using scientific evidence or interventions
a. N/A b. N/A c. N/A d. N/A e. N/A f. N/A	a. Synthesize scientific evidence and knowledge for use in preparing recommendations b. Identify the key types of intervention for problem c. Develop assessment of the potential impact on the public’s health from alternative interventions d. Propose new recommendations or modifications to existing interventions as necessary on the basis of study findings e. Prioritize potential public health interventions f. Link any recommended behavioral interventions with risk communication and risk reduction methods	a. N/A b. N/A c. Approve assessment of the potential impact on the public’s health from alternative interventions d. Select new recommendations or modifications to existing interventions as necessary on the basis of study findings e. Approve prioritization of potential public health interventions f. Ensure that any recommended behavioral interventions are linked with risk communication and risk reduction methods	a. Synthesize scientific evidence and knowledge for use in preparing recommendations b. Evaluate the key types of intervention for problem c. Evaluate the potential impact on the public’s health from alternative interventions d. Formulate new recommendations or modifications to existing interventions as necessary on the basis of study findings e. Prioritize potential public health interventions f. Link any recommended behavioral interventions with risk communication and risk reduction methods
<i>I. Assist in evaluation of programs</i>	<i>I. Evaluate programs</i>	<i>I. Ensure evaluation of programs</i>	<i>I. Evaluate programs</i>
1. N/A	1. Assist in development of measurable and program-relevant goals and objectives	1. Approve measurable and program-relevant goals and objectives	1. Develop measurable and program-relevant goals and objectives in collaboration with program staff
2. N/A	2. Assist in development of program logic models and theories of action	2. Decide on program logic models and theories of action	2. Develop program logic models and theories of action in collaboration with program staff
3. Collect surveillance and other data for use in tracking program objectives and outcomes	3. Identify surveillance and other data for use in tracking program objectives and outcomes	3. Approve surveillance and other data for use in tracking program objectives and outcomes	3. Synthesize surveillance and other data to allow tracking of program objectives and outcomes
4. Assist in tracking progress toward program objectives and outcomes	4. Record progress toward program objectives and outcomes	4. Monitor progress toward program objectives and outcomes	4. Critique progress toward program objectives and outcomes
5. Communicate information about progress toward program objectives and outcomes to program managers	5. Communicate information about progress toward program objectives and outcomes to program managers and staff for use in program planning and modification	5. Incorporate information about progress toward program objectives and outcomes in decisions on program planning and modification	5. Evaluate progress toward program objectives and outcomes for program managers and staff to aid in program planning and modification

II. Skill Domain—Basic Public Health Sciences

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
A. Know how causes of disease affect epidemiologic practice	A. Use current knowledge of causes of disease to guide epidemiologic practice	A. Use current knowledge of causes of disease to guide epidemiologic practice	A. Use current knowledge of causes of disease to guide epidemiologic practice
1. Relate basic etiologic processes for human diseases to subject matter areas of interest (e.g., infectious diseases, chronic diseases)	1. Relate basic etiologic processes for human diseases to subject matter areas of interest (e.g., infectious diseases, chronic diseases)	1. Ensure that basic etiologic processes for human diseases are related to subject matter areas of interest (e.g., infectious diseases, chronic diseases)	1. Ensure that basic etiologic processes for human diseases are related to subject matter areas of interest (e.g., infectious diseases, chronic diseases)
2. Apply understanding of human and environmental biology and behavioral sciences and principles to determine potential biological mechanisms of disease	2. Apply understanding of human and environmental biology and behavioral sciences and principles to determine potential biological mechanisms of disease	2. Ensure the application of understanding of human and environmental biology and behavioral sciences and principles to determine potential biological mechanisms of disease	2. Ensure the application of understanding of human and environmental biology and behavioral sciences and principles to determine potential biological mechanisms of disease
3. N/A	3. Explain how genetics and genomics affect disease processes and public health policy and practice	3. Ensure that the role of genetics and genomics on disease processes are considered when developing public health policy and practice	3. Synthesize knowledge about the effect of genetics and genomics on disease processes and public health policy and practice
4. Apply principles of the host/agent/environment model to disease causation, prevention, and control	4. Apply principles of the host/agent/environment model to disease causation, prevention, and control	4. Ensure the application of principles of the host/agent/environment model to disease causation, prevention, and control	4. Ensure the application of principles of the host/agent/environment model to disease causation, prevention, and control
5. Describe the role and influence of sociobehavioral factors (including community, political, social, family, and individual behavioral factors) in health risks and health status	5. Describe the role and influence of sociobehavioral factors (including community, political, social, family, and individual behavioral factors) in health risks and health status	5. Ensure that the role and influence of sociobehavioral factors (including community, political, social, family, and individual behavioral factors) are incorporated into understanding health risks and health status	5. Synthesize knowledge about the role and influence of sociobehavioral factors (including community, political, social, family, and individual behavioral factors) in health risks and health status
6. N/A	6. Incorporate etiologic principles into development of disease prevention and control strategies	6. Incorporate etiologic principles into development of disease prevention and control strategies	6. Incorporate etiologic principles into development of disease prevention and control strategies

II. Skill Domain—Basic Public Health Sciences

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<i>B. Identify the role of laboratory resources in epidemiologic activities</i>	<i>B. Use laboratory resources to support epidemiologic activities</i>	<i>B. Ensure the use of laboratory resources to support epidemiologic activities</i>	<i>B. Develop processes for using laboratory resources to support epidemiologic activities</i>
1. Identify the roles and capabilities of public health laboratories and other laboratories and how they are used in epidemiologic investigations	1. Identify the roles and capabilities of public health laboratories and other laboratories and how they are used in epidemiologic investigations	1. Examine the roles and capabilities of public health laboratories and other laboratories and how they are used in epidemiologic investigations	1. Synthesize the roles and capabilities of public health laboratories in epidemiologic investigations
2. N/A	2. Coordinate laboratory and epidemiologic activities, including test selection, communication, and reporting results in the field	2. Ensure the coordination of laboratory and epidemiologic activities, including test selection, communication, and reporting results in the field	2. Determine laboratory and epidemiologic activities including test selection, communication, and reporting results in the field
3. N/A	3. Interpret laboratory data, accounting for factors that influence the results of screening and diagnostic tests	3. Evaluate the interpretation of laboratory data accounting for factors that influence the results of screening and diagnostic tests	3. Develop methods for the interpretation of laboratory data, accounting for factors that influence the results of screening and diagnostic tests
4. Use identified specimen collection, storage, and transportation measures	4. Implement necessary specimen collection, storage, and transportation measures	4. Oversee necessary specimen collection, storage, and transportation measures	4. Develop methods for specimen collection, storage, and transportation measures
<i>C. Use identified informatics tools in support of epidemiologic practice</i>	<i>C. Apply principles of informatics, including data collection, processing, and analysis, in support of epidemiologic practice</i>	<i>C. Ensure application of principles of informatics, including data collection, processing, and analysis, in support of epidemiologic practice</i>	<i>C. Apply principles of informatics, including data collection, processing, and analysis, in support of epidemiologic practice</i>
1. Use information technologies and communication tools necessary to support epidemiologic investigations and surveillance	1. Use information technologies and communication tools necessary to support epidemiologic investigations and surveillance	1. Provide access to information technologies and communication tools necessary to support epidemiologic investigations and surveillance	1. Use information technologies and communication tools necessary to support epidemiologic investigations and surveillance
2. Use software tools that support public health data acquisition, entry, abstraction, analysis, and reporting	2. Use software tools that support online searching, public health data acquisition, entry, abstraction, management, analysis, planning, mapping, and reporting	2. Provide access to software tools that support online searching, public health data acquisition, entry, abstraction, management, analysis, planning, mapping, and reporting	2. Use software tools that support online searching, public health data acquisition, entry, abstraction, management, analysis, planning, mapping, and reporting
3. Apply procedures (policies) and technical means (security) to ensure the integrity and protection of confidential information in electronic files and computer systems	3. Apply procedures (policies) and technical means (security) to ensure the integrity and protection of confidential information in electronic files and computer systems	3. Assure that procedures (policies) and technical means (security) are used to ensure the integrity and protection of confidential information in electronic files and computer systems	3. Apply procedures (policies) and technical means (security) to ensure the integrity and protection of confidential information in electronic files and computer systems

II. Skill Domain—Basic Public Health Sciences

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
4. Combine data and information from multiple sources to create new information to support public health decision-making	4. Combine data and information from multiple sources to create new information to support public health decision-making	4. Use data and information from multiple sources to create new information to support public health decision-making	4. Synthesize data and information from multiple sources to create new information to support public health decision-making
<ul style="list-style-type: none"> a. Suggest limitations of current data collection that might determine the need for new data collection b. N/A c. N/A d. N/A 	<ul style="list-style-type: none"> a. Determine whether new data collection is needed or existing datasets or systems can be mined b. Participate in the development of new or enhancement of existing databases to support epidemiologic investigations, surveillance, etc. c. Use interoperable data standards as needed for storage and transmission, and be able to find the relevant standards specifications as needed d. Maintain electronic documents (guidelines, datasets), including documented versions, dissemination methods, and relevant standards specifications 	<ul style="list-style-type: none"> a. Decide whether to create new data collection systems or to mine existing datasets or systems b. Oversee the development of new or enhancement of existing databases to support epidemiologic investigations, surveillance, etc. c. IV. Skill Domain—Community Dimensions of Practice

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<p>2. Assist in providing epidemiologic input into an assessment of the local public health system to aid in state, local, or tribal public health planning</p>	<p>2. Provide epidemiologic input into an assessment of the local public health system to aid in state, local, or tribal public health planning</p>	<p>2. Lead epidemiologic portion of assessment of the local public health system to aid in state, local, or tribal public health planning</p>	<p>2. Lead epidemiologic portion of assessment of the local public health system to aid in state, local, or tribal public health planning</p>
<p>a. N/A b. N/A c. N/A d. Assist in identifying the specific populations within the community or region that each public health program seeks to reach e. Assist in identifying the epidemiologic data collection and analysis needs of each program f. N/A g. N/A h. N/A i. N/A j. N/A k. N/A</p>	<p>a. Map the different levels of government public health (tribal, local, state, and federal) and their roles and responsibilities in the community b. Characterize the interactions between different levels of government in relation to community public health programs c. Assess the funding streams for public health and epidemiology programs that affect the community d. Identify the specific populations within the community or region that each public health program seeks to reach e. Identify the epidemiologic data collection and analysis needs of each program f. N/A g. Map the community medical-care delivery system, including financing and structure and major policy issues affecting medical care h. Characterize relationships among public and private organizations within the community i. Identify environmental, social, and cultural factors that affect the community’s health j. Document changes that are occurring or are expected to occur that affect the community’s health or the local public health system (e.g., a Mobilizing for Action through Planning and Partnerships forces of change assessment)</p>	<p>a. Ensure that the different levels of government public health (tribal, local, state, and federal) and their roles and responsibilities are mapped out in the community b. Ensure that the interactions between different levels of government in relation to community public health programs are characterized c. Assess the funding streams for public health and epidemiology programs that affect the community d. Ensure that the specific populations within the community or region that each public health program seeks to reach are identified e. Ensure that the epidemiologic data collection and analysis needs of each program are identified f. Identify community themes and strengths g. Ensure that the community medical-care delivery system is mapped out, including financing and structure and major policy issues affecting medical care h. Ensure that relationships among public and private organizations within the community are characterized i. Ensure that environmental, social, and cultural factors that affect the community’s health are analyzed</p>	<p>a. Map the different levels of government public health (tribal, local, state, and federal) and their roles and responsibilities in the community b. Characterize the interactions between different levels of government in relation to community public health programs c. Assess the funding streams for public health and epidemiology programs that affect the community d. Identify the specific populations within the community or region that each public health program seeks to reach e. Identify the epidemiologic data collection and analysis needs of each program f. Identify community themes and strengths g. Map the community medical-care delivery system, including financing and structure and major policy issues affecting medical care h. Characterize relationships among public and private organizations within the community i. Evaluate environmental, social, and cultural factors that affect the community’s health j. Examine changes that are occurring or are expected to occur that affect the community’s health or the local public health system (e.g., a Mobilizing for Action through Planning and Partnerships forces of change assessment)</p>

IV. Skill Domain—Community Dimensions of Practice

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
	2. Provide epidemiologic input into an assessment of the local public health system to aid in state, local, or tribal public health planning <i>(continued)</i>	2. Lead epidemiologic portion of assessment of the local public health system to aid in state, local, or tribal public health planning <i>(continued)</i>	2. Lead epidemiologic portion of assessment of the local public health system to aid in state, local, or tribal public health planning <i>(continued)</i>
	k. Identify threats and opportunities that arise from these changes	j. Examine changes that are occurring or are expected to occur that affect the community’s health or the local public health system (e.g., a Mobilizing for Action through Planning and Partnerships forces of change assessment) k. Evaluate threats and opportunities that arise from these changes	k. Evaluate threats and opportunities that arise from these changes
<i>B. Participate in development of community partnerships to support epidemiologic investigations</i>	<i>B. Participate in development of community partnerships to support epidemiologic investigations</i>	<i>B. Develop community partnerships to support epidemiologic investigations</i>	<i>B. Develop community partnerships to support epidemiologic investigations</i>
1. N/A	1. Identify partners and stakeholders necessary for epidemiologic investigation	1. Sustain relationships with partners and stakeholders necessary for epidemiologic investigation	1. Solicit partners and stakeholders necessary for epidemiologic investigation
2. Contribute to community-specific participation strategies to engage the public in the planning, implementation, and evaluation of epidemiologic investigations when indicated	2. Use community-specific participation strategies in the planning, implementation, and evaluation of epidemiologic investigations when indicated	2. Ensure the use of community-specific participation strategies in the planning, implementation, and evaluation of epidemiologic investigations when indicated	2. Develop community-specific participation strategies in the planning, implementation, and evaluation of epidemiologic investigations when indicated
3. N/A	3. Clarify the roles of partners and stakeholders in the epidemiologic investigation	3. Clarify the roles of partners and stakeholders in the epidemiologic investigation	3. Clarify the roles of partners and stakeholders in the epidemiologic investigation
4. N/A	4. Participate in the development of epidemiologic studies, including incorporating input from task forces and other target audiences	4. Lead the development of epidemiologic studies, including incorporating input from task forces and other target audiences	4. Lead the development of epidemiologic studies, including incorporating input from task forces and other target audiences

V. Skill Domain—Cultural Competency

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
A. Describe population by race; ethnicity; culture; societal, educational, and professional backgrounds; age; gender; religion; disability; and sexual orientation	A. Describe population by race; ethnicity; culture; societal, educational, and professional backgrounds; age; gender; religion; disability; and sexual orientation	A. Differentiate special populations by race; ethnicity; culture; societal, educational, and professional backgrounds; age; gender; religion; disability; and sexual orientation	A. Differentiate special populations by race; ethnicity; culture; societal, educational, and professional backgrounds; age; gender; religion; disability; and sexual orientation
1. Identify special populations in the community that may be significant in addressing public health problems	1. Identify special populations in the community that may be significant in addressing public health problems	1. Ensure that each special population is characterized by size, location, and other factors that may be significant in addressing public health problems	1. Characterize each special population by size, location, and other factors that may be significant in addressing public health problems
B. Establish relationships with groups of special concern (e.g., disadvantaged or minority groups, groups subject to health disparities, historically underrepresented groups)	B. Establish relationships with groups of special concern (e.g., disadvantaged or minority groups, groups subject to health disparities, historically underrepresented groups)	B. Establish relationships with groups of special concern (e.g., disadvantaged or minority groups, groups subject to health disparities, historically underrepresented groups)	B. Establish relationships with groups of special concern (e.g., disadvantaged or minority groups, groups subject to health disparities, historically underrepresented groups)
1. N/A	1. Study populations' histories and past treatment by public health system	1. Evaluate populations' histories and past treatment by public health system	1. Evaluate historical context of populations' histories and past treatment by public health system
2. N/A	2. N/A	2. Formulate communication strategies for special populations on the basis of knowledge of historical treatment	2. Formulate communication strategies for special populations on the basis of knowledge of historical treatment
3. N/A	3. N/A	3. Organize outreach efforts to special populations	3. Organize outreach efforts to special populations
4. N/A	4. Develop mechanisms to receive input from groups of special concern into the design and conduct of epidemiologic practice	4. Ensure that input from groups of special concern is used in the design and conduct of epidemiologic practice	4. Ensure that input from groups of special concern is used in the design and conduct of epidemiologic practice

V. Skill Domain—Cultural Competency

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<i>C. Describe surveillance systems that include groups subject to health disparities or other potentially underrepresented groups (using standard categories where available)</i>	<i>C. Design surveillance systems to include groups subject to health disparities or other potentially underrepresented groups (using standard categories where available)</i>	<i>C. Ensure that surveillance systems are designed to include groups subject to health disparities or other potentially underrepresented groups (using standard categories where available)</i>	<i>C. Ensure that surveillance systems are designed to include groups subject to health disparities or other potentially underrepresented groups (using standard categories where available)</i>
1. Identify standard categories used to define special populations	1. Use standard categories when defining special populations	1. Ensure that standard categories are used to define special populations, taking into account historical, social, and political contexts of standard categories	1. Select standard categories used to define special populations
2. Identify historical, social, and political contexts of standard categories	2. Identify historical, social, and political contexts of standard categories	2. N/A	2. Examine historical, social, and political contexts of standard categories
3. Identify limitations of standard categories	3. Identify limitations of standard categories	3. N/A	3. Explain limitations of standard categories
4. N/A	4. Work with community as necessary to develop new categories if standard categories are unavailable	4. Lead collaboration with community as necessary to develop new categories if standard categories are unavailable	4. Work with community as necessary to develop new categories if standard categories are unavailable
5. N/A	5. Design data collection tools to capture information needed to assess health disparities	5. Ensure that data collection tools and sampling plan capture information needed to assess health disparities and provide stable estimates in populations of interest	5. Verify that data collection tools will capture information needed to assess health disparities
6. N/A	6. Design sampling plan to ensure sample size large enough to provide stable estimates in populations of interest	6. N/A	6. Evaluate sampling plan to ensure sample size large enough to provide stable estimates in populations of interest
7. Avoid potential adverse impacts of data collection on special populations	7. Avoid potential adverse impacts of data collection on special populations	7. Ensure that data collection does not adversely impact special populations	7. Avoid potential adverse impacts of data collection on special populations

V. Skill Domain—Cultural Competency

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<i>D. Conduct investigations using languages and approaches tailored to population</i>	<i>D. Conduct investigations using languages and approaches tailored to population</i>	<i>D. Ensure that investigations use languages and approaches tailored to population</i>	<i>D. Organize investigations that use languages and approaches tailored to population</i>
1. Identify primary language of population	1. Identify primary language of population	1. Identify primary language of population	1. Identify primary language of population
2. Use knowledge of specific sociocultural factors in the population	2. Use knowledge of specific sociocultural factors in the population	2. Use knowledge of specific sociocultural factors in the population	2. Use knowledge of specific sociocultural factors in the population
3. N/A	3. N/A	3. Identify mechanisms for contact and communication with population	3. Identify mechanisms for contact and communication with population
4. N/A	4. N/A	4. Ensure that investigative methods will accommodate special needs of the population	4. Identify investigative methods that will accommodate special needs of the population
5. N/A	5. N/A	5. Synthesize this knowledge into an investigation strategy	5. Synthesize this knowledge into an investigation strategy
6. N/A	6. N/A	6. Facilitate staff access to identified support or mechanisms needed to communicate with population	6. N/A
<i>E. Use standard population categories or subcategories when performing data analysis</i>	<i>E. Use standard population categories or subcategories when performing data analysis</i>	<i>E. Ensure that standard population categories or subcategories are used for data analysis</i>	<i>E. Ensure that standard population categories or subcategories are used for data analyses</i>
<i>F. N/A</i>	<i>F. Use knowledge of specific sociocultural factors in the population to interpret findings</i>	<i>F. Use knowledge of specific sociocultural factors in the population to interpret findings</i>	<i>F. Use knowledge of specific sociocultural factors in the population to interpret findings</i>
1. N/A	1. Identify cultural factors that may have influenced outcome of investigation	1. Evaluate cultural factors that may have influenced outcome of investigation	1. Evaluate cultural factors that may have influenced outcome of investigation
2. N/A	2. N/A	2. Assess impact of investigation findings on the population	2. Assess impact of investigation findings on the population

V. Skill Domain—Cultural Competency

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<i>G. Support public health actions that are relevant to the affected community</i>	<i>G. Recommend public health actions that would be relevant to the affected community</i>	<i>G. Ensure that actions are relevant to the affected community</i>	<i>G. Recommend actions that will be relevant to the affected community</i>
1. Use alternative actions that have been shown to be effective in similar populations	1. Use alternative actions that have been shown to be effective in similar populations	1. Ensure use of alternative actions that have been shown to be effective in similar populations	1. Evaluate alternative actions that have been shown to be effective in similar populations
2. Use action strategies that will address the issues identified in the investigation while meeting the needs of the community	2. Use action strategies that will address the issues identified in the investigation while meeting the needs of the community	2. Create action strategies that will address the issues identified in the investigation while meeting the needs of the community	2. Create action strategies that will address the issues identified in the investigation while meeting the needs of the community
3. N/A	3. N/A	3. Validate the choice of action strategy through consultation with the affected community	3. Validate the choice of action strategy through consultation with the affected community

VI. Skill Domain—Financial and Operational Planning and Management (Operational Planning, Financial Planning, and Management Skills)

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<i>A. Conduct epidemiologic activities within the financial and operational plan of the agency</i>	<i>A. Conduct epidemiologic activities within the financial and operational plan of the agency</i>	<i>A. Create operational and financial plans for future epidemiologic activities</i>	<i>A. Conduct epidemiologic activities within the financial and operational plan of the agency</i>
1. N/A	1. Set goals and objectives for epidemiology program	1. Set goals and objectives for epidemiology program	1. Provide input into goals and objectives for epidemiology program
2. N/A	2. Formulate tasks to meet goals and objectives	2. Formulate tasks to meet goals and objectives	2. Formulate tasks to meet goals and objectives
3. Construct a timeline for carrying out the tasks	3. Construct a timeline for carrying out the tasks	3. Construct a timeline for carrying out the tasks	3. Construct a timeline for carrying out the tasks
4. Conduct epidemiologic activities, including travel, within specified budget	4. Describe personnel, staffing, travel, and other needs for epidemiologic activities	4. N/A	4. Describe personnel, staffing, travel, and other needs for epidemiologic activities
5. Maintain accurate records	5. Maintain accurate records	5. N/A	5. Maintain accurate records
<i>B. Describe the financial planning and budgetary process of the epidemiology program</i>	<i>B. Assist in developing a fiscally sound budget that will support the activities defined in the operational plan and is consistent with the financial rules of the agency</i>	<i>B. Formulate a fiscally sound budget that will support the activities defined in the operational plan and is consistent with the financial rules of the agency</i>	<i>B. Describe the financial planning and budgetary process of the agency</i>
1. N/A	1. Assess the financial rules of the agency and available resources to establish boundaries for the budget	1. Assess the financial rules of the agency and available resources to establish boundaries for the budget	1. Assess the financial rules of the agency and available resources to establish boundaries for the budget
2. List resources necessary to carry out tasks in the operational plan, including personnel, equipment, supplies, and travel costs	2. Estimate resources necessary to carry out tasks in the operational plan, including personnel, equipment, supplies, and travel costs	2. Justify resources necessary to carry out tasks in the operational plan, including personnel, equipment, supplies, and travel costs	2. Estimate resources necessary to carry out tasks in the operational plan, including personnel, equipment, supplies, and travel costs
3. N/A	3. Estimate expenditures that may arise from unexpected epidemiologic activities, such as rapid investigations and emergency response	3. Estimate expenditures that may arise from unexpected epidemiologic activities, such as rapid investigations and emergency response	3. N/A

VI. Skill Domain—Financial and Operational Planning and Management (Operational Planning, Financial Planning, and Management Skills)

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<i>C. Implement operational and financial plans</i>	<i>C. Implement operational and financial plans</i>	<i>C. Oversee implementation of operational and financial plans</i>	<i>C. Implement operational and financial plans for assigned projects</i>
1. N/A	1. Assign tasks to staff members	1. Assign tasks to staff members	1. N/A
2. Compare progress to expectations established in plan	2. Compare progress to expectations established in plan	2. Compare progress to expectations established in plan	2. Compare progress to expectations established in plan
3. N/A	3. Track fiscal expenditures against financial plan	3. Evaluate fiscal expenditures against financial plan	3. Evaluate fiscal expenditures against financial plan
4. Adjust activities as necessary to stay within defined budget	4. Adjust activities as necessary to stay within defined budget	4. Adjust activities as necessary to stay within defined budget	4. Adjust activities as necessary to stay within defined budget
5. Seek additional resources as necessary to support unexpected activities	5. Seek additional resources as necessary to support unexpected activities	5. Seek additional resources as necessary to support unexpected activities	5. N/A
6. Follow chain of command	6. Follow chain of command	6. Follow chain of command and agency financial rules	6. Follow chain of command
<i>D. N/A</i>	<i>D. Assist in preparation of proposals for extramural funding</i>	<i>D. Develop requests for proposals for extramural funding to support additional epidemiologic activities and special projects</i>	<i>D. Prepare proposals for extramural funding for review and input from managers</i>
1. N/A	1. Identify funding needs for epidemiologic activities	1. Identify epidemiologic activities that need extramural funding	1. Identify funding needs for epidemiologic activities
2. N/A	2. Identify funding opportunities for epidemiologic activities	2. Evaluate funding opportunities to support epidemiologic activities	2. Identify funding opportunities for epidemiologic activities
3. N/A	3. Prepare proposals, in whole or in part, to obtain funding for epidemiologic activities	3. Create scientifically sound proposals that will support epidemiologic activities and meet the requirements of the funding agency	3. Prepare proposals, in whole or in part, to obtain funding for epidemiologic activities

VI. Skill Domain—Financial and Operational Planning and Management (Operational Planning, Financial Planning, and Management Skills)

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<i>E. N/A</i>	<i>E. Use management skills</i>	<i>E. Use management skills</i>	<i>E. N/A</i>
1. N/A	1. Establish roles and responsibilities of all participants in epidemiologic activities	1. Establish roles and responsibilities of all participants in epidemiologic activities	1. N/A
2. N/A	2. Communicate role/responsibility expectations clearly to all team members	2. Communicate role/responsibility expectations clearly to all staff	2. N/A
3. N/A	3. Assess performance of team members as they carry out their responsibilities	3. Assess performance of team members as they carry out their responsibilities	3. N/A
4. N/A	4. Coach team members as needed in the performance of their responsibilities	4. Coach team members as needed in the performance of their responsibilities	4. N/A
5. N/A	5. N/A	5. Represent epidemiology program on the public health agency management team	5. N/A
<i>F. Use skills that foster collaborations, strong partnerships, and team building to accomplish epidemiology program objectives</i>	<i>F. Use skills that foster collaborations, strong partnerships, and team building to accomplish epidemiology program objectives</i>	<i>F. Promote collaborations, strong partnerships, and team building to accomplish epidemiology program objectives</i>	<i>F. Use skills that foster collaborations, strong partnerships, and team building to accomplish epidemiology program objectives</i>
1. Support collaborative relationships with key personnel of other agencies relevant to the particular epidemiologic activity	1. Build collaborative relationships with key personnel of other agencies relevant to the particular epidemiologic activity	1. Ensure development of collaborative relationships with key personnel of other programs and agencies relevant to the particular epidemiologic activity	1. Build collaborative relationships with key personnel of other agencies relevant to the particular epidemiologic activity
2. Work well with other epidemiology project team members of varied backgrounds and education	2. Work well with other epidemiology project team members of varied backgrounds and education	2. Lead epidemiology project team members of varied backgrounds and education in working collaboratively and effectively together	2. Work well with other epidemiology project team members of varied backgrounds and education
3. N/A	3. Clarify roles and responsibilities of all participants in epidemiologic activities	3. Oversee development of clear roles and responsibilities of all participants in epidemiologic activities	3. Clarify roles and responsibilities of all participants in epidemiologic activities

VII. Skill Domain—Leadership and Systems Thinking

Tier 1: Entry-Level or Basic Epidemiologist	Tier 2: Mid-Level Epidemiologist	Tier 3a: Senior-Level Epidemiologist: Supervisor and/or Manager	Tier 3b: Senior Scientist/ Subject Area Expert
<i>A. N/A</i>	<i>A. Support the epidemiologic perspective in the agency strategic planning process</i>	<i>A. Promote the epidemiologic perspective in the agency strategic planning process</i>	<i>A. Promote the epidemiologic perspective in the agency strategic planning process</i>
<i>B. Support the organization’s vision in all programs and activities</i>	<i>B. Promote the organization’s vision in all programs and activities</i>	<i>B. Lead the creation of epidemiology program’s vision in the context of the agency’s plan</i>	<i>B. Promote the organization’s vision in all programs and activities</i>
1. Support strategic plan	1. Assist in strategic planning	1. Develop strategic plan	1. Assist in strategic planning
<ul style="list-style-type: none"> a. N/A b. N/A c. N/A d. N/A e. N/A 	<ul style="list-style-type: none"> a. Describe process for organizational strategic planning b. Identify internal and external issues that may impact delivery of essential public health services (competency from Council on Linkages) c. Facilitate collaboration with internal and external groups to ensure participation of key stakeholders (competency from Council on Linkages) d. Participate in the development of strategic priorities and associated action plans e. N/A 	<ul style="list-style-type: none"> a. Develop process for epidemiologic strategic planning within agency vision b. Evaluate internal and external issues that may impact delivery of essential public health services c. Direct collaboration with internal and external groups to ensure participation of key stakeholders d. Develop strategic priorities and associated action plans e. Ensure that research agenda is consistent with budget resources and with strategic plan 	<ul style="list-style-type: none"> a. Describe process for organizational strategic planning b. Identify internal and external issues that may impact delivery of essential public health services (competency from Council on Linkages) c. Facilitate collaboration with internal and external groups to ensure participation of key stakeholders (competency from Council on Linkages) d. Participate in the development of strategic priorities and associated action plans e. Create research agenda for program areas of responsibility for incorporation into strategic plan
2. Support change	2. Implement change	2. Implement change	2. Implement change
<ul style="list-style-type: none"> a. Demonstrate individual skills necessary to implement change, including ability to support change b. Demonstrate ability to function as member of a team during change processes c. N/A 	<ul style="list-style-type: none"> a. Demonstrate individual skills necessary to implement change, including ability to support change b. Demonstrate ability to function as member of a team during change processes c. Participate in monitoring and sustaining organizational change 	<ul style="list-style-type: none"> a.
