The National Syndromic Surveillance Program (NSSP) Community of Practice (CoP) Charter

Introduction

The National Syndromic Surveillance Program (NSSP) Community of Practice (CoP) charter provides the foundational and procedural basis for community and committee operations. It defines the community’s mission, goals, organizational structure, and operational guidelines.

Community Overview

A CoP is a group of persons who share a concern, a set of problems, or a passion about a topic, and who deepen their knowledge and expertise by interacting regularly.1 The three distinct elements that comprise a CoP are 1) a community that enables interaction (such as discussions, collaborative activities, and relationship building); 2) an identity defined by a shared domain of interest (such as syndromic surveillance); and 3) a shared practice of experiences, tools, methods, and ways of addressing recurring problems.

The NSSP CoP is a collaboration among states and local public health jurisdictions that contribute data to the NSSP BioSense Platform, public health practitioners who use local syndromic surveillance systems, Centers for Disease Control and Prevention (CDC) programs, other federal agencies, partner organizations, hospitals, healthcare professionals, and academic institutions. The NSSP CoP leverages the expertise and resources of its members to advance syndromic surveillance practice and the utilization of syndromic surveillance platforms (including the NSSP BioSense Platform). Through peer-to-peer collaborative activities, members of the NSSP CoP come together virtually to share information, build knowledge, develop expertise, and solve problems aimed at improving syndromic surveillance practice.

Partnership with CSTE

The Council of State and Territorial Epidemiologists (CSTE) partners with CDC NSSP to cultivate, facilitate, and maintain the NSSP CoP in accordance with cooperative agreement (CoAg) #6NU38OT000297: Strengthening Public Health Systems and Services through National Partnerships to Improve and Protect the Nation’s Health.

CSTE acts as the professional home for applied epidemiologists representing multiple levels of public health practice. Its mission is to promote the effective use of epidemiologic data to guide public health practice and improve health, and its vision is to use the power of epidemiology to improve the public’s health. Members are epidemiologists and informaticians who conduct public health surveillance, support public health surveillance systems, and utilize surveillance data to guide public health action. CSTE is in a unique position to encourage the existing membership base to participate and collaborate with ongoing NSSP CoP activities.

---

NSSP CoP Strategic Framework

The vision, mission and overarching goals of the NSSP CoP supports Focus Area 2 of the Division of Health Informatics and Surveillance (DHIS) 2019-2021 Strategic Framework: Syndromic Surveillance – Provide expertise, services, and systems to enable CDC and its partners to share detailed, timely, high-quality syndromic surveillance data to support public health practice.

NSSP CoP Vision

The vision of the NSSP CoP is an inclusive and connected community of public health practitioners working together to advance syndromic surveillance practice.

NSSP CoP Mission

The mission of the NSSP CoP is to advance syndromic surveillance practice by leveraging the expertise and resources of its members to strengthen public health surveillance capabilities nationwide.

Overarching NSSP CoP Goals

1. Build syndromic surveillance expertise and capacity (“Tools”)
2. Promote the utility and application of syndromic surveillance (“Promoting”)
3. Collaborate and share data (“Data Sharing”)
4. Integrate syndromic surveillance into everyday public health surveillance (“Integrating”)

NSSP CoP Organizational Structure

An established structure for the NSSP CoP sets a foundation for strategic action and ensures alignment of community activities with the NSSP CoP’s mission and goals. The following table details the community roles and their high-level responsibilities.

<table>
<thead>
<tr>
<th>NSSP CoP Community Role</th>

### Membership in the NSSP CoP

Membership in the NSSP CoP is voluntary and open to any person or organization interested in advancing syndromic surveillance practice. Membership in the CoP is free of charge and does not require CSTE membership. Participation in the NSSP CoP online community requires registration with the NSSP CoP completing this form. Members may also use this form to update the member information (e.g., join new groups or update contact information) or submit their request to leave the NSSP CoP.

### Guiding Principles

All members of the NSSP CoP are asked to subscribe to the following Guiding Principles:

- Act with integrity and respect others.
- Strive to create an environment of trust and collaboration.
- Refrain from sharing or posting content that is classified, sensitive, or otherwise not releasable to the general public.
Consider opportunities to work on cross-jurisdictional and/or cross-disciplinary projects that promote learning and collaboration experiences.

NSSP CoP Leadership and Officer Roles

NSSP CoP Core Committee

CSTE establishes and facilitates the NSSP CoP Core Committee – a community-driven body constituted of volunteer CoP members representing STLT public health jurisdictions (not limited to public health authority) and CDC. The purpose of the Core Committee is to provide guidance to CSTE to ensure that the NSSP CoP effectively promotes the use and practice of syndromic surveillance and enables a peer-to-peer, collaborative environment to foster and facilitate knowledge sharing and capacity building.

The Core Committee includes the following individuals:

- Core Committee Chair
- Core Committee Past Chair*
- Core Committee Deputy Chair
- Co-chairs of the NSSP CoP subcommittees
- Co-leads of CoP workgroups and user groups
- CDC technical advisors
  
  *If STLT criteria is met

Nomination and election procedures have been included below. Details on authority, responsibilities, and activities can be found in “NSSP Community of Practice Core Committee Positions: Desired Attributes and Position Expectations” document.

Core Committee Chair

To facilitate aspects of the Core Committee function, a Core Committee Chair will be elected every two years. Any member of the NSSP CoP who works at an STLT health department (not limited to public health authority) is eligible to be nominated for the position. Six weeks prior to the end of the current Core Committee Chair’s term (i.e., six weeks prior to July 31), an open call for nominations email will be sent to all NSSP CoP members. Nominations will be accepted from any CoP member (self-nominations acceptable). CSTE will review the nominations received by the deadline, and after confirming the nominee is fit for the position, CSTE will contact all nominees to confirm interest in running for the position and understanding of position responsibilities. The slate of eligible candidates will be announced to the entire NSSP CoP membership, and every NSSP CoP member is entitled to cast up to one vote for their preferred candidate.

The nominee that receives the majority of votes will be elected as the Core Committee Chair. In the instance that two candidates each receive the same number of majority votes (i.e., tie), a run-off between those two candidates will be held. The Core Committee Chair’s term shall begin on August 1 of the election year.

The elected Core Committee Chair will sit on the Core Committee for three years. The Core Committee Chair’s term shall be limited to one term (two years), ending on July 31st of the second year of the Core Committee Chair’s term, followed by one year serving as the Core Committee Past Chair. Upon completion of a Core Committee Chair’s term, elections will be held for a new Core Committee Chair. If no candidates for the role of
Core Committee Chair are nominated, the presiding Core Committee Chair will nominate at least one candidate from the eligible Community of Practice membership base.

Should the Core Committee Chair be unavailable to perform their duties, the Deputy Chair is responsible for stepping in to fulfill the role and responsibilities. The non-elected Core Committee members would serve as alternates should the Core Committee Chair and Deputy Chair be unavailable to carry out their roles.

The Core Committee Past Chair may remain on the Core Committee as an advisor to the Core Committee and the Core Committee Chair for one year if they meet the STLT criteria (not limited to public health authority). During that time, they may provide historical context, best practices, and lessons learned to assist the Core Committee, Core Committee Chair, and Core Committee Deputy Chair in decision-making, as needed.

Core Committee Deputy Chair

The Core Committee Chair nominee that receives the second most votes during the election will be elected as the Core Committee Deputy Chair. Should the Core Committee Chair permanently resign, the Core Committee Deputy Chair will serve the remainder of the departing Core Committee Chair’s term.

The term of the Core Committee Deputy Chair shall be two years. Upon completion of a Core Committee Chair and Core Committee Deputy Chairs’ concurrent two-year terms, elections will be held.

In the instance that the Core Committee Chair steps down (either voluntarily or no longer meets the requirements of the position), and the Core Committee Deputy Chair backfills that role, CSTE will solicit a Core Committee member (i.e., Subcommittee Co-Chair) to fill in the Core Committee Deputy Chair position for an interim time until ad hoc nominations and an election can be held.

Subcommittee Co-Chairs

Each subcommittee will be led by at least two NSSP CoP members representing a STLT jurisdiction (not limited to public health authority) and will be referred to as Subcommittee Co-Chairs. Subcommittee chairs shall be subject matter experts (SME) in syndromic surveillance with an interest in the subcommittee’s specific topic area. The positions are voluntary and solicited for by the Core Committee and CSTE staff when a Subcommittee Co-Chair vacancy exists in the Community of Practice’s structure. Subcommittee Co-Chairs are not term-limited positions; for as long as the Subcommittee Co-Chairs are able and willing to lead their subcommittee, they will remain on the Core Committee and in their Subcommittee Co-Chair position. Should a Subcommittee Co-Chair step down, CSTE will work with the Core Committee to solicit and identify another volunteer SME to fill the Subcommittee Co-Chair vacancy.

Workgroup Co-Leads

Should a NSSP CoP member(s) propose to establish a workgroup to accomplish a specific project/deliverable, it shall be led by at least two Co-leads, with one representing a STLT public health jurisdiction (not limited to public health authority). Given workgroups should be project/deliverable-based, the workgroup will continue to exist until the workgroup has completed its proposed deliverable(s). Once complete, the workgroup co-leads will step down and the workgroup shall dissolve. Workgroup leads will be invited to participate in monthly Core Committee meetings and will be considered as Core Committee member for as long as the workgroup exists.
To establish a new group (i.e., workgroup, usergroup), a CoP member must submit their proposal to CSTE. CSTE will review the proposal with the Core Committee and the core committee will formally vote to approve the group.

To dissolve a group, CSTE will review the request with the core committee and the core committee will formally vote to dissolve the group.

To transition a group (e.g., a subcommittee to a workgroup), the current chairs/leads will notify CSTE, the Core Committee Chair, and Deputy Chair of their request. CSTE and the chairs will review the request and the Core Committee will be notified of the change.

Usergroup Co-Leads
Each usergroup will be led by two Co-leads. There is no STLT (not limited to public health authority) affiliation requirement for these positions. User group co-leads shall be subject matter experts. The positions are voluntary and are not time limited. Similar to subcommittee chairs, should a usergroup lead stepdown, CSTE and Core Committee will identify a new lead. Usergroup leads will be invited to participate in monthly Core Committee meetings and will be considered as Core Committee members.

CDC Technical Advisors
Subject matter representatives from CDC shall attend the Core Committee meetings and provide subject matter expertise and technical assistance to the Committee, as needed. Experts from CDC are chosen by their respective groups using whatever means each group sees fit to use. While invited to participate in Core Committee Meetings and Discussions, CDC Technical Advisors are not considered to be official NSSP CoP Core Committee Members.

Organizational Liaisons
CSTE and the Core Committee may invite liaisons from other public health organizations, or relevant organizations, who have an interest in syndromic surveillance to participate in and/or present at Core Committee meetings.

Acknowledgement of Charter
The undersigned acknowledge the following:
- They have reviewed the NSSP Community of Practice charter in its entirety,
- Approve of the outlined procedures and responsibilities for the NSSP CoP Core Committee, Facilitator/Coordinator (CSTE), and Champion/Sponsor (CDC)
- Agree to abide by all outlined procedures, and
- Fulfill all identified responsibilities.
The charter will be reviewed annually at the start of the CoAg year. Changes to this community charter will be coordinated with and approved by the standing Core Committee Chair, Facilitator/Coordinator representative, and Champion/Sponsor representative undersigned or their designated representatives.
