**NAHC Forecasts Trump Election Impact on Home Care and Hospice**

NAHC published a 3-part series of insights and predictions of what may occur during the Trump Administration that could specifically impact home care and hospice providers nationally.

NAHC views 2017 as presenting new opportunities to advance the cause of our industry and the value of our service to healthcare delivery reforms, however, cautions that change may be significant with any yet-to-be determined ACA reforms and the potential of Medicaid Block Grants to states.

**Reminder: Compliance Required for Public Act 15-91 Mandated Reporting for Workplace Violence**

By January 1, 2016 and annually thereafter, health care employers with: 1) at least 50 full-time or part-time employees; and 2) programs licensed by the Department of Public Health ("DPH"), must report to DPH the number of intentional workplace violence incidents occurring on the employer's premises during the preceding calendar year and the specific area or department of the employer's premises where such incidents occurred.

This important change in a health care employer's external reporting obligation regarding workplace violence became effective on October 1, 2015, and was implemented as part of Public Act 15-91, which revised current law regarding hospital reporting of nurse staffing levels. The Public Act did not make any other changes to Connecticut's existing health care workplace violence protection laws.
