Three Rivers Community College
Library Technology Certificate

NEWS ALERT:
LIBRARY TECHNOLOGY BECOMES ONE-YEAR PROGRAM

We have significant news! This fall we are changing the sequence of offering our courses from a two-year program to a one-year program. We believe this change will offer students more flexibility and for some, cost savings. Students will now be able to complete the certificate in just two semesters. However, some students may wish to complete in 18 or 24 months (or more). A one-year program will give students more control of their schedules as they will be assured that every 12 months the course they need will be offered. A second benefit to students is that four courses is a full-time load. Full-time students may be eligible for full financial aid.
