# SPOTLIGHT ON KIDS CAN CODE

Kids can learn to code in fun and easy ways. Many elementary schools and public libraries are stepping up and offering kids opportunities to learn coding along with reading and math. Coders as young as ten years old are learning to create their own apps, games, and animations. Introduce readers to skills and concepts that enhance computational thinking and digital literacy.

**FREE YEARLY UPDATES!**

Free sample eBooks

- **Computational thinking** through hands-on activities that teach the most important aspects of coding in an age-appropriate manner
- **Coding activities** linked to expository text provide strong context and successful experiences
- **Correlations** to the NEW K12 Computer Science Framework and ISTE Science Standards for students
