Spine section Questionnaire

Email address *

cvleggeert@lumc.nl

Spine research group name *

Leiden-the Hague spine group, the Netherlands

Coworkers *

Wilco Peul, Willem Pondaag, Ralph de Boer, Pieter Schutte, Mark Arts, Jasper Wolfs, Niels van der Gaag, Godard de Ruiter, Gijs Overdevest

Main research topic *

Evaluation of spine care (cohort studies), etiology of radiculopathy (fundamental research)

Additional research topics

Cervical disc prosthesis evaluation, trauma and spine, spinal cord lesions, odontoid fractures, spine deformity in rheumatoid arthritis, isthmic spondylolisthesis, degenerative spondylolisthesis, conservative versus surgical treatment of cervical radiculopathy, arthrosis, achondroplasia, chordoma treatment, pain treatment, PTED, thromboembolic complications, transforaminal epidural injections in sciatica
Area of research

Clinical

Short summary of research group activities *

Cervical disc prosthesis evaluation, trauma and spine, spinal cord lesions, odontoid fractures, spine deformity in rheumatoid arthritis, isthmic spondylolisthesis, degenerative spondylolisthesis, conservative versus surgical treatment of cervical radiculopathy, arthrosis, achondroplasia, chordoma treatment, pain treatment, PTED, thromboembolic complications, transforaminal epidural injections in sciatic

Top 5 publication's references *
