Clinical Sessions in the Treatment of Peri-implant diseases
It is an honor for us to present this joint SEPA-DGI-DG PARO symposium. It will be one of the most attractive scientific meetings of the year due to its novel format, its clinical focus, and because it represents a great step towards cooperation among these three scientific societies from Spain and Germany. This cooperation has been conceived with the intention of merging the knowledge of the three societies so that an exchange of clinical approaches among the experts in periodontal and peri-implant diseases of SEPA, DGI and DG PARO will result in a clear message for the treatment of peri-implant diseases.

With this in mind, on Friday, four practical hands-on courses will take place in parallel, in which four global leaders in implant therapy will share their surgical approaches with small groups of participants, so that each of them can perform the instructed techniques, in animal and/or artificial models, under the careful supervision of each of the speakers.

On Saturday, the Symposium titled “Clinical sessions in the treatment of peri-implant diseases” will take place. Throughout the day, experts will present how they have transferred their knowledge from the treatment of periodontal diseases to the treatment of peri-implant diseases, so that they may share with the participants their personal approaches and their management of different cases, which will subsequently be discussed in detail.

Ultimately, this SEPA-DGI-DG PARO symposium will provide in-depth view into the field of peri-implantitis therapy under the tutelage of great experts in the field and in a relaxed, participatory and international environment.

If you are interested in the prevention and treatment of peri-implant diseases, you should not miss this event. You are more than welcome in Mallorca!

Scientific coordinators:

Adrián Guerrero, SEPA

Frank Schwarz, DGI

Christof Döerfer, DGI

Hands On Workshops in the field of Peri-implantitis prevention and therapy

Friday January 24

Programme
Saturday January 25

09.00 - 09.05 Welcome message.
DGI President, DG PARO President and SEPA President.

09.10 - 10.30 PERIODONTITIS AND PERI-IMPLANTITIS: SIMILARITIES AND MAIN DIFFERENCES.
Moderator & chairman: Peter Eickholz.
• Global epidemiology of periodontal and peri-implant diseases. Karina Obreja.
• Diagnosis and treatment plan of peri-implant diseases with periodontal eyes. Mariano Sanz.

10.30 - 11.50 NON-SURGICAL THERAPY IN THE TREATMENT OF PERI-IMPLANTITIS.
Moderator & chairman: Gerhard Iglhaut
• Non-surgical therapy in the treatment of periodontitis: concepts to be transferred to the treatment of Peri-implant diseases. Dennis Schaller.
• Submucosal instrumentation around implants with Peri-implant diseases. Ausra Ramanauskaite.
• The use of adjunctive antimicrobials in the non-surgical therapy of periimplantitis. Antonio Liñares.

11.50 - 12.20 Coffee break

12.20 - 13.40 SURGICAL THERAPY IN THE TREATMENT OF PERI-IMPLANTITIS.
Moderator & chairman: José Nart
• From periodontal surgery around teeth to access flap surgery in the treatment of peri-implantitis. Stefan Fickl.
• Implant surface decontamination and/or modification during surgical access to peri-implantitis lesions. Jürgen Becker.
• Apically positioned flaps in the treatment of peri-implantitis: when are they indicated? Ignacio Sanz Martín.

13.40 - 15.00 Lunch

15.00 - 16.20 HARD TISSUE RECONSTRUCTION THERAPY AROUND PERI-IMPLANT DEFECTS:
Moderator & chairman: Christof Döerfer.
• From periodontal regeneration to peri-implant defect reconstruction: key biological pathways and modifying factors. Michael Christgau.
• Which biomaterials should we use in the reconstruction of peri-implant defects? Eik Schiegnitz.
• Flap designs and techniques in the reconstructive therapy around peri-implantitis lesions Alberto Ortiz-Vigón.

16.20 - 17.40 SOFT TISSUE RECONSTRUCTION AROUND IMPLANTS:
Moderator & chairman: Frank Schwarz and Robert Sader.
• From muco-gingival surgery around teeth to soft tissue reconstruction around implants: lessons to be learned. Markus Schlee.
• The role of keratinized mucosa in peri-implant health. When and how should we augment it? Gerhard Iglhaut.
• Soft tissue augmentation during peri-implantitis surgery: is it really necessary. Alberto Monje.

17.40 - 18.00 Coffee break

18.00 - 19.20 PREVENTION OF PERI-IMPLANT DISEASES:
Moderator & chairman: Adrián Guerrero.
• Supported periodontal therapy for primary and secondary prevention of periodontal and peri-implant diseases. Sven Rinke.
• Implant-supported prosthetics focused on the prevention of future peri-implant diseases. Juan Blanco.

Chairmen: Christof Döerfer, Frank Schwarz and Adrián Guerrero.
