

Enhanced natural healing in dentistry:

L-PRF

Leuven, Belgium
6-7 March 2020

This interactive two-day course will allow to include the use of L-PRF in all discussed treatments with confidence and following the correct procedures.

Speakers:

Marc Quiryren

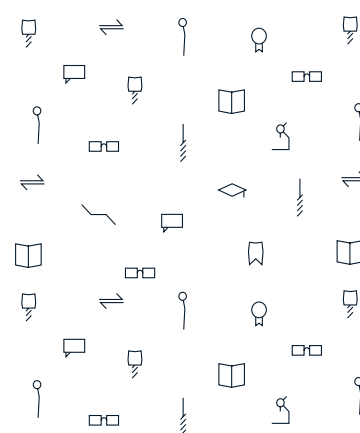

Nelson Pinto

Andy Temmerman

Master Clinician Course

Friday 6 March

09.00-10.30	Basic characteristics of L-PRF (composition, antibacterial characteristics, growth factors, ...) and potential applications (intra & extra-oral)
11.00-11.45	Preparation of L-PRF membranes, plugs, exudate (including video)
11.45-12.30	L-PRF membranes, plugs, exudate for tooth extraction/ridge preservation: clinical outcome
13.15-15.00	Hands-on: centrifugation protocol, preparation L-PRF membranes/plugs/exudate & ridge preservation
15.30-16.30	L-PRF membranes, plugs, exudate for sinus floor elevation: clinical outcome
16.30-17.15	Live surgery
17.15-18.15	L-PRF for implant coating/gingival plastic surgery/periodontitis: clinical outcome

Saturday 7 March

09.00-09.45	Preparation of L-PRF soft/bone block (including video & hands-on)
09.45-10.45	L-PRF soft/bone block for sinus augmentation, sockets with bony dehiscence and horizontal/vertical bone augmentation (part A): clinical outcome
11.15-12.15	L-PRF soft/bone block for sinus augmentation, sockets with bony dehiscence and horizontal/vertical bone augmentation (part B): clinical outcome
13.00-14.30	Hands-on: preparation L-PRF soft/bone block for sinus augmentation and horizontal/vertical bone augmentation
14.30-15.15	L-PRF in immediate implant placement: clinical outcome
15.45-16.15	L-PRF in the treatment of peri-implantitis: clinical outcome
16.15-18.00	Step by step protocol for different applications supported by videos
