

Scott Halbrooks

Plant Manager
La Porte VCM Facility
Occidental Chemical Corporation

Scott Halbrooks is the Plant Manager for the OxyChem La Porte VCM facility, a position he assumed in May 2023.

Scott began his career with OxyChem in 1994 as a process engineer at the Deer Park Chlor-Alkali facility. Since that time, Scott has progressed through a series of positions of increasing responsibility in both operations and maintenance. He also served at the Natural Gas Odorizing, NGO, facility in Baytown, Texas, the Deer Park VCM facility in Deer Park, Texas, and the INDSPEC Resorcinol facility in Petrolia, Pennsylvania. While at the INDSPEC facility, Scott progressed to the role of Plant Manager and in 2015 relocated back to Texas to be the Assistant Plant Manager for OxyChem's Pasadena PVC and Deer Park PVC/KOH facilities. Scott was then promoted to Plant Manager of the Pasadena PVC Plant in 2017 and held that position until recently moving to the La Porte VCM facility.

Scott is a graduate of Texas A&M University with a degree in Chemical Engineering.
