

Experience

Arcanum Infrastructure is a Houston-based petrochemical infrastructure company that owns and operates industrial production and logistics facilities supporting the chemical manufacturing sector. It produces and handles products such as butene-1 and provides storage, processing and transportation services via rail, pipeline and barge across the Gulf Coast, supporting domestic and global supply chains.

Safety

Safety is a core value at Arcanum Infrastructure. The company integrates environmental, health, safety and security (EHSS) practices into all operations, with a focus on process safety, employee training, engineered controls and emergency preparedness to protect employees, contractors and surrounding communities.

Innovation

Arcanum operates an “infrastructure-as-a-service” model, providing reliable access to petrochemical products through long-term agreements and integrated logistics. This approach improves supply chain reliability, reduces capital burden for customers and helps manage commodity price volatility.

Environment

Arcanum Infrastructure is committed to environmental stewardship and Responsible Care® principles, focusing on regulatory compliance, risk reduction, efficient resource use and minimizing emissions and operational impact through continuous improvement.
