Discussion

Join the Health and Safety Council (HASC) for an introduction to the modernized eNotify, a trusted emergency communication platform built for industry. Built within the established HASC enterprise technology environment, eNotify now combines stronger security and reliability with streamlined incident reporting, improved dashboard visibility and mobile-friendly access. The session will highlight how the platform connects industrial facilities with emergency management teams, industry representatives and responsible agencies to share critical information quickly and support a coordinated response. Andrea Fittge, eNotify Project Director at HASC, and Jeff Suggs, EHCMA Emergency Management Committee Co-Chair, will discuss platform enhancements and how organizations can prepare their teams for the updated experience.

This webinar is intended for EHCMA member companies and partner organizations, particularly those in the oil and gas and petrochemical sectors.
