In what other ways do our associations collaborate with each other to promote the industry?
What trends/issues are our associations addressing (or need to address), preferably in collaboration with each other?
What kinds of innovation promoting sustainability and/or growth are the associations seeing among their memberships?
How can associations work more in tandem to address the trends & innovations and the continued changing landscape, perhaps in particular those mentioned in the past few days, that benefit individual programs as well as the industry as a whole?
AUDIENCE: It’s Your Turn!
