ESSKA awards are given to scientists at our biennial Congress in order to recognise their high level of research. For the 2022 congress in Paris, the competition was tough with more than 1,200
abstracts submitted. In order to give more publicity and draw more attention to the research and work of the winners, each month we will include in the ESSKA Times a summary from the lead author, explaining the rationale and the usefulness of their study. The latest in our Awards Corner is:

**Muscle/Tendon Best Poster Award**: Outcomes of the First 347 Patients seen through a Novel Sports Pathway at Fiona Stanley Hospital
