AMERICAN ACADEMY OF ESTHETIC DENTISTRY MISSION

To promote the integration of dental esthetics into the total spectrum of oral health care and provide a leadership role for the profession by defining the highest interdisciplinary clinical, scientific, artistic and ethical standards through research, publications and educational presentations.
AAED is the world’s oldest, most prestigious esthetic dental academy, comprised of distinguished professionals from virtually every dental discipline. Our Annual Meeting has a long-standing tradition of delivering outstanding programs presented by world-renowned clinicians. This year’s theme, “THE INTERDISCIPLINARY SUMMIT”, promises to continue this legacy by providing a program that emphasizes delivering quality patient care and achieving overall clinical excellence.

I am thrilled to host this milestone 40TH ANNUAL MEETING in my favorite mountain town, Telluride, Colorado. It is the perfect backdrop for what is sure to be one of our best and most memorable meetings. Looking over the tremendous line-up of speakers and topics we have in place, it is clear to me that this year’s educational meeting promises to provide you and your invited guests with an outstanding opportunity to share ideas, debate concepts, network with peers and learn from one another in an atmosphere that is sociable and collegial.

Enjoy!

2015 MEETING HIGHLIGHTS

☒ The meeting will consist of three days of exceptional didactic sessions, presented by 27 internationally-renowned speakers. Our invited experts will highlight the interdisciplinary nature of esthetics and the important role each discipline plays in achieving exceptional patient outcomes and improving overall patient health.

AAED GRANT FOR RESEARCH IN ESTHETIC DENTISTRY

2014 RECIPIENT – DAVID D. KOJIC, DDS, MSC

We congratulate Dr. David D. Kojic as the recipient of this grant for his relevant research entitled, “Efficacy of LED light-polymerization units in private dental offices in Toronto.”

This study aims to bring awareness to the curing of dental resin composite by using proper manipulation and adequate light-curing techniques to guarantee the best outcome for materials used to restore teeth. The results from the study will most likely influence regulatory agencies to make some guidelines for photopolymerization of dental resin composites.

The annual AAED Grant for Research in Esthetic Dentistry is funded by AAED via the Charles L. Pincus Fund and Oral Health America. Kojic is a graduate student in the Restorative Dentistry department at the University of Toronto in Ontario.
