Multiple Pathways of Recovery

April 23, 2019
Tom Hill
National Council for Behavioral Health
tomh@thenationalcouncil.org

Sponsored by the Florida Alcohol & Drug Abuse Association and the State of Florida, Department of Children and Families
Learning Objectives:

- Expand the continuum of care to institutionalize recovery supports
- Identify various components that make up a well-formed Recovery Ecology
- Understand a diverse range of formal and informal recovery pathways
A Story of the Healing Forest
Following episodes of treatment and/or incarceration, individuals often return to communities that are ill-equipped to support their recovery.
The Healing Forest becomes a Recovery Ecology

FERTILE SOIL

SAMHSA’s Working Definition of Recovery

A process of change through which individuals improve their health and wellness, live a self-directed life, and strive to reach their full potential. (SAMHSA, 2011)

10 Guiding Principles:
- Hope
- Respect
- Strengths/Responsibility
- Addresses Trauma
- Culture
- Relational
- Peer Support
- Holistic
- Many Pathways
- Person-driven
Recovery Capital is the sum of the strengths and supports – both internal and external – that are available to a person to help them initiate and sustain long-term recovery from substance use disorders (SUD).

(Granfield and Cloud, 1999, 2004; White and Cloud, 2006)
Consequences of SUD Can Deplete Recovery Capital

- Limited education
- Minimal or spotty work history
- Low or no income
- Criminal background
- Poor rental history
- Bad credit; accrued debt; back taxes
- Unstable family history
- Inadequate health care
Creating and Reinforcing Recovery Capital

Essential Ingredients for Sustained Recovery:

▪ Safe and affordable place to live
▪ Steady employment and job readiness
▪ Education and vocational skills
▪ Life and recovery skills
▪ Health and wellness
▪ Recovery support networks
▪ Sense of belonging and purpose
▪ Community and civic engagement
Creating and Reinforcing Recovery Capital

**Common Sticking Points:**
- Legal issues
- Expunging criminal records
- Financial status: debt, taxes, budgeting, etc.
- Restoring revoked licenses: professional, business, driver’s
- Regaining custody of children
- Developing relationship and parenting skills
- Developing recovery support networks and community connections
## Recovery Capital Assessment

Recovery Community Principles and Values

- Primacy of recovery
- Authenticity of lived experience
- Diversity and inclusion
- Multiple pathways
- Leadership development
- Participatory Process
Recovery Working Assumptions

- A set of replacements is initially necessary
- Recovery flourishes in community
- Informed choices help determine recovery pathways
- Recovery is a long-term and ongoing process
- Recovery is evolutionary
One Size Does Not Fit All

Variables:
- Demographics and personal background
- Recovery capital scale
- Varieties of lived experience
- Personal style, preference, and choice
- Cultural and community norms
12-Step Groups and Fellowships

- Includes Alcoholics Anonymous, Narcotics Anonymous, and more than 45 other groups that focus on individual- and family-related addiction
- History and evolution
- Depth, reach, and accessibility
- Free of charge
- Effect on society
The Best of 12-Step Groups

- Recovery in bite sizes
- Degrees of commitment
- Emphasis on self-reflection
- Sharing through personal storytelling
- Leadership development
- Sense of belonging and connection to community
- Service to others
Limitations of 12-Step Groups

- Overriding perceptions: rigid, cult-like, religious, exclusionary
- Insular attitudes based on cultural dominance
- Doesn’t work for everyone
- NA: history of excluding people on medication

Addiction Treatment

- Treatment is a pathway to recovery, often episodic
- Multiple pathways of treatment
- Not everyone in recovery receives treatment
- Treatment plans vs. Recovery plans
- Outcomes: treatment vs. recovery
Medication-assisted Recovery (MAR)

- Why this concept is important
- Three-legged stool: Medication + Counseling + Recovery Supports
- MAR = Abstinence, with the right variables
- MAR 12-step Groups
- MARS programs
Peer Recovery Support Services

- Recovery coaching
- Peer bridgers
- Peer-facilitated support and educational groups
- Peer telephone support
- All Recovery meetings
- Recovery Community Centers
Harm reduction refers to a range of services and policies that lessen the adverse consequences of drug use and protect public health. Unlike approaches that insist that people stop using drugs, harm reduction acknowledges that many people are not able or willing to abstain from illicit drug use, and that abstinence should not be a precondition for help.

(Open Society Foundations, 2016)
Harm Reduction Engagement

- “Any positive change”
- “Meet people where they are at, but don’t leave them there.”
- Harm reduction on the continuum of care
- Recovery interfacing with Harm Reduction
- Naloxone distribution
- Peer support in ER and community outreach settings
