# HOW WE SUPPORT OUR COMMUNITY

Persons with lived experience offer our participants guidance and support at every stage of recovery. Our Certified Recovery Peer Support specialists meet participants where they are in their recovery journey.

We offer Recovery Capital Assessments and Recovery Management
Plans through the Faces and Voices Recovery Data Platform at the
Pinellas Peer Respite Center, nicknamed the Catchers Mitt. Thanks
to a generous donation from BayCare Hospital, The Peer Respite
provides a 3 – 14 day stabilization of care for persons who do not
meet the requirements of a medical detox, and do not have the
income to check themselves into a private facility.

Outreach Campaigns, inspired by our previous subcontracts with Central Florida Behavioral Health Network, such as the >5% Campaign and the Recovery Starters Kit, have born the Recovery Round Tables throughout Tampa Bay, Narcan distribution efforts that have been responsible for numerous overdose reversals, and homeless outreach events that reach persons who need it the most.

# Brief History

- CONTRACTOR O
- •REF has been providing community connection events, free Narcan and training, as well as access to individual and group support since 2017. Since opening, we have supported the recovery journey of hundreds and been a leading advocate for our community to become more recovery focused and less acute-care-focused.
- •Since 2021, Recovery Epicenter Foundation has been privileged to provide peer support and outreach services to the Tampa Bay Region thanks to funding from our managing entity Central Florida Behavioral Health Network. That funding ended on June 30<sup>th</sup> of 2023.
- •We are a board of directors and staff comprised almost entirely of persons in recovery ourselves.

The First Saturday of Every Month!

 Recovery Epicenter Foundation organizes our recovery community to give back to persons less fortunate than us. With homelessness being a part of many of our members' stories, this process inspires community involvement and a collaborative effort that multiple organizations can support.

# Narcan Outreach

 Began as the Gideon Narcan Policy, which intended to get a box of Narcan into every hotel and motel end table next to the bible, our Narcan distribution efforts have grown to encompass multiple festivals, an informational video, numerous local news stories highlighting saturating areas that suffer from overdoses repeatedly, and the development of community maps. Today the #notonemorelife campaign is responsible in large part for civilian Narcan use growing to a third of all Narcan use in the Tampa Bay Region.

# Collegiate Recovery Programs

Recovery Epicenter Foundation has been blessed to have numerous interns from Saint Petersburg College over the years. And, thanks to that connection, REF began offering a peer support worker to the students of SPC at the Gibbs Campus in February of 2023. Since that time we have grown the effort to include Gibbs and Clearwater Campus, and we are about to start the same process with Eckerd College. The intent is to develop more opportunities for students to access peer support services and eventually gain their internship hours as peer support trainees, building the Collegiate Recovery Programs on site, under the supervision of a peer support worker dedicated to the health and wellness of the student recovery community.

# Peer Respite Center "The Catcher's Mitt"

- Thanks to a generous donation from BayCare
  Hospital, the Recovery Epicenter Foundation is
  now able to provide peer respite services to
  persons who do not meet the medical
  threshold for care, and do not have the means
  to check themselves into a facility. This project
  epitomizes the principle of help being available
  when a person is asking for help.
- Since opening in March of 2023, we have provided peer respite services to over 130 participants, connecting the majority back to a sober living home, some to higher levels of care, and only "losing" 13% thus far to an active use cycle.
- Food is provided for free by local food banks, and clothes are available for the participants.
- We have developed through experience, a ratio of one peer support worker per every 10 participants.

The Catcher's Mitt is a peer-led 3-7 day recovery community assessment, observation, and recovery support service. We serve those who do not qualify for medical detox, hospitalization, or simply lack the funds for private treatment.

The Mitt offers its participants a home-like environment. We provide 24/7 peer support as they transition from active use to post acute withdrawl.

# Recovery Round Tables

 Began in March of 2022 in Pasco County, in large part due to Central Florida Behavioral Health Network no longer allowing us to provide peer support services without LMHC or LCSW supervision, the Recovery Round Tables were our first major community event campaign. We began with the engaged Pasco community and expanded to the Hillsborough community. We turned over the Hillsborough Round Table to the Hillsborough Recovery Coalition, an emerging RCO, in January of 2023. Attempts at duplicating our success have been seen in the development of a Pinellas County Round Table and continue to inspire others across the Tampa Bay area. The intent was and remains connecting community stakeholders together to close gaps in the substance use disorder continuum of care. When we talk to one another, we accomplish together what none of us can achieve individually.

# Community **Events**

- Recovery Epicenter Foundation is dedicated to building and maintaining the recovery infrastructure of the Tampa Bay Region, and that includes hosting regular activities for the recovery community.
- It is with regular and persistent effort, that we can demonstrate to participants that the recovery way of life is more desirable than the life that stopped being exciting and fun long before we were ready or willing to accept help for our substance use disorder.

### SUNDAY, NOVEMBER 27TH AT 1:00PM TICKET PRICE IS \$50 WHICH INCLUDES

- Statewide Recovery Day Meet-Up at 11:00A In The Miami Open Tennis Grandstand

# Recovery Epicenter Foundation Next Steps

- #1 Developing contingency management software which positively reinforces the behavioral modification we are aiming for when helping a person with substance use disorder survive the disease of an active, and too often, terminal addiction.
- #2 Gaining access to existing supports which have been denied to the peer support field and organizations in the Tampa Bay Region, such as transitional living or treatment vouchers that support persons who no longer have the financial means or family support to access recovery stabilization.
- #3 Continuing to expand upon existing community events so that harm reduction strategies become the norm and not that exception to the abstinence expectation.

# • IN SUMMARY

Recovery Epicenter Foundation is available to provide peer to peer Outreach Recovery Support for any person or program seeking assistance and will continue to provide Recovery Support with the participants we are already working with daily. With all of us, together, we will end overdose deaths in our area by connecting people with a substance use disorder to services that assist the recovery process.
