OUTSTANDING PD&E STUDY

I-95 AT BROWARD BLVD. PD&E STUDY

FDOT DISTRICT 4
The purpose of the Study was to identify and develop short-term and long-term design concepts to:
- Improve traffic flow to and from I-95 (General Use and Express) and along Broward Boulevard and
- Improve intermodal connectivity and access.

The need for the project is to improve connectivity for all modes of transportation within the study area.

The final preferred alternative serves the general use lanes, 95 Express Lanes, and the multi-modal transportation center, with three sets of redundant movements for each sub-system.
