

UNITED TO ADVANCE HEALTH CARE  
AND PHARMACY PRACTICE

**PharmView**

## 2018 Legislative Session Update and Summary

**UPDATED 5/3/2018**

by Michael Jackson, BPharm  
Executive Vice President and CEO

The 2018 legislative session has come to its end and not without a fair amount of work on behalf of the Florida Pharmacy Association volunteer leaders, advocates and lobby team. Health care issues get the attention of state lawmakers because it primarily represents a major costs of government. This year

the House and Senate adopted an \$88.7 billion budget. Compare that to the \$66.5 billion budget approved for fiscal year 2009-2010. With an estimated 21 million Floridians calling our state home the cost of state government is about \$4,224 for every man woman and child living in our state. This year's budget planning as affected by two costly hurricanes that hit our coast as well as spending plans that were adopted to provide protective services in our state's schools. You can bet that health care is a major part of the costs associated with state government. That includes but is not limited to providing health care benefits for state employees, Medicaid funding and local county health departments. It is obvious to us that pharmacists can play a major role in keeping those costs under control. To do that will require some long overdue changes in the pharmacy practice act that we will discuss in this report below.

An advocacy program requires a lot of planning and preparation as well as resources. Our work not only includes proactively advocating for pharmacy issues but we also expend effort on

defense on things that we believe affect public health quality, costs and access. The planning actually begins during our annual meeting with policy statements from the FPA House of Delegates. Some of these policy statements may include action items that are then directed to the FPA leadership to implement. Because the FPA's resources are not unlimited it is necessary to begin with members of the appointed and elected Governmental Affairs Committee of the FPA. The Governmental Affairs Committee (GAC) is charged with providing guidance to the Board of Directors on legislative or regulatory issues and is required to meet at least annually. At their meeting last August the GAC formulated an advocacy plan and presented it to the Board of Directors at their August 2017 meeting for review and approval.

For the past several years we have worked with our lobby team at Adams Street Advocates (ASA) to carry our issues to the Florida Capitol. It is difficult to get bills passed and for the past several years the Governor of Florida has placed his pen on approved bills that had a lot of Florida Pharmacy Association advocacy efforts on it. Please allow me to give our many thanks to Claudia Davant, Rebecca Roman, Dave Ericks along with T.J. Morton and John Lockwood at the Lockwood Law firm for their legislative and legal services.

<b>FPA Governmental Affairs Committee</b>		
Aneesh Lakhani – Chair	Scott Tomerlin - Board Chair	Suzanne Wise – President
David Mackarey – Speaker	Jeanette Connelly – Vice Speaker	Ashley Huff – Treasurer
Angela Garcia – President Elect	S. Mark Hobbs – FPPC Chair	Kathy Baldwin – FSHP Liaison
Christopher Konig – At Large Member	Christina Laird – At Large Member	Eric Larson – At Large Member
Preston McDonald – At Large Member	James Wright – Co-Chair	Norman Tomaka – Past Chair
Theresa Tolle – FPPC Treasurer	Michael Jackson – FPA EVP	Claudia Davant – FPA Lobbyist
Rebecca Roman – FPA Lobbyist	Dave Ericks – FPA Lobbyist	TJ Morton – FPA Legal Council

### **2017 – 2018 Advocacy Plan**

The above members of the FPA Government Affairs Committee met in Orlando last August to review legislative activity for the past several years and also policy statements adopted by the FPA House of Delegates. Their work resulted in the adoption and recommendation to the Board of Directors the following list of issues:

#### High Priority

- MAC Transparency Law Enforcement
- PBM Transparency
- Amending Collaborative Practice Agreements

#### Advocate if Opportunity Presented

- PBM Enrollment Standards
- Revisions to current laws requiring the 3 hour CE from an exclusive provider
- Pharmacist administration of narcotic antagonists

## Monitor

- Continuing of maintenance medication therapy
- Requirement for consultant pharmacist reviews in ALF's, surgery centers etc
- Equality of pharmacists
- Florida pharmacist dispensing of oral contraceptive medications without a prescription
- Pharmacist prescribing authority for prescription drug delivery aids, devices or accessories

The FPA Board of Directors received the recommendations from the FPA GAC and with further discussion recognized that there is an issue with gag clauses in PBM contracts and possible introduction of issues related to telemedicine that may affect the practice of pharmacy. The Board adopted the recommendations of the GAC as well as supported legislation that addresses gag clause contract issues. The Board also delegated to the Presidents Committee to address any policy making surrounding telepharmacy. The FPA GAC under chair Aneesh Lakhani met weekly during the 2018 session to receive an update on the status of bill progress. Updates were also posted regularly in the FPA's social media sites as well as in Stat News that is emailed to members.

### **What was the legislative landscape for 2018?**

This year we saw 989 bills that were filed in the Senate with 2,203 bills filed in the House. There were 135 bills that passed the Senate and 327 bills that were adopted by the Florida House. This means of the 3,192 bills that were filed 462 were adopted at least in the House or Senate. In order for legislation to get to the Governor's

**FPA Past President Theresa Tolle comments on PBM issues before the House Health Innovations Subcommittee**

desk both the House and Senate must approve bill content. Only 200 bills passed both the House and Senate which means that only about 6% of all the bills filed made it to the finished line. Last year 8% of the bills filed were sent to the Governor so this year's productivity by the House and Senate was worse. Let's exam what issues were addressed during this session.

## **PHARMACY BILLS THAT PASSED**

### **Regulation of PBMs**

House bill 351 was sponsored by Representative David Santiago (Rep – Deltona) and supported by the Florida Pharmacy Association. Florida laws currently include a regulatory framework over pharmacy benefit managers under the Board of Pharmacy however it was made clear to us that there was no enforcement mechanism in place. Early in the session the FPA was successful in

advocating for a workshop before the House Health Innovations Subcommittee on PBMs. FPA Past President and current FPPC Treasurer Theresa Tolle provided valuable comment before the committee on PBM issues. Also providing comment before the committee were FPA member's James Wright, Preston McDonald and Aneesh Lakhani. HB351 made a number of revisions to address PBM issues including the following:

- Moves regulation of pharmacy benefit managers (PBMs) away from the Board of Pharmacy and into the Office of Insurance Regulation (OIR)
- Requires pharmacists to inform a patient if the cash price is lower than a patient's coinsurance
- Plan contracts with PBMs must not allow PBMs to interfere with pharmacist obligation to disclose lower cost options (gag clause protection for pharmacies)
- Plan contracts with PBMs must not allow PBMs to require patients to pay more than the lesser of
  - Applicable cost share amount or
  - The retail price of the drug in absence of prescription drug coverage
- Defines what a maximum allowable cost (MAC) is under OIR
- Defines what a PBM is under OIR
- MAC lists must be updated every 7 days
- Must register (and renew) with the OIR instead of BOP
- Registration fee not to exceed \$500
- Must be a process for eliminating drugs from MAC list or modifying MAC costs or drug products if unavailable

Original version of the bill (HB351) would have required plans to prohibit their contracted PBMs from forcing patients to use a pharmacy that the PBM has an ownership interest in. There was also an appeals process in the original bill that was removed by the legislature from the original bill. Also included in the original bill was language that would have subjected the PBMs to the Florida Deceptive Unfair Trades Practices Act. This was removed from the bill as well. While many of these provisions were removed from HB351 the legislature is beginning to take notice to PBM issues and we are told that there are plans to bring other items to the table during the 2019 session. HB351 was approved by both the House and Senate and as of the publishing date of this message is headed to the governor's desk for his signature.

#### **WHAT DOES THIS MEAN FOR PHARMACISTS AND PHARMACIES?**

The original law was placed in the pharmacy practice act but that law gave no enforcement authority to the Board. There was no mechanism to discipline or take action against a PBM. This change in law now gives the Office of Insurance regulation that already has oversight over insurance plans additional jurisdiction of a PBM. It also stops practices where PBMs have sanctioned pharmacies for disclosing lower cost alternatives of prescription drug therapy to patients. Pharmacists will have a new obligation to disclose to patients the cost savings when

there is an option to pay retail for their prescriptions or to pay their coinsurance. Pharmacies may have to document that this information was provided to patients.

### Controlled Substance Prescribing

HB21 filed by Representative Jim Boyd (Rep – Bradenton) implemented a number of measures for the prescribing of controlled substances in Florida. Recent news reports have highlighted a continuing problem with opioid deaths in this country. In Florida fentanyl caused 1,390 deaths, oxycodone caused 723 deaths and hydrocodone caused 245 deaths in 2016. In 2017 Governor Scott declared a state of emergency on this issue giving rise to the language in this bill which became a priority of the Florida legislature. HB21 once signed by Governor Scott would:

- Define “acute pain” as the normal, predicted, physiological and time-limited response to an adverse chemical, thermal or mechanical stimulus associated with surgery, trauma, or acute illness
- “Acute Pain” would not include pain related to cancer, a terminal condition, palliative care or trauma injury with an injury severity score of 9 or higher
- Creates a controlled substance CE requirement for prescribers
- CE can only be provided by the Florida Medical Association
- Licensing Board must not allow a licensee missing the CE to renew
- The CE must be 2 hours and can be included in the hours required per biennial period
- Requires the Department of Health to adopt rules on the standards for treating acute pain
- Limits prescribing of C-II opioid drugs for acute pain to 3 days
- Continues to allow dispensing practitioners to dispense opioids for surgical procedures but clarifies that such dispensing is limited to 3 or 7 day supply
- The bill allows for the prescribing up to a 7 day opioid supply if noted “ACUTE PAIN EXCEPTION” on the Rx<sup>1</sup>
- Requires documentation in patient’s medical record
- Patients that are being treated for nonacute pain have noted on their prescriptions “NONACUTE PAIN” on prescriptions for C-II opioids
- Prescriber must issue a prescription for opioid antagonist for trauma patients with an injury severity score of 9 or higher when prescribing a C-II opioid
- Continues to require verification of patients government issued ID by both pharmacists and dispensing practitioners
- If proper ID is not available the pharmacist can validate the prescription and the patient’s identity with the prescriber or the prescriber’s agent
- Adjudication of health plan eligibility is considered proper identification

---

<sup>1</sup> The original language in the bill required that the prescriber note “MEDICALLY NECESSARY” on the prescription which was a conflict with current Florida laws on generic interchange. The FPA advocated for a change to “ACUTE PAIN EXCEPTION” to avoid confusion.

- Identification requirement not required for patients in an institutional or long term care setting.
- Tightens exemptions for pain clinic registrations
- Creates requirement to query the PDMP database or document a reason why not
- Requirement to query the PDMP
  - Not applicable to patients under the age of 16
  - Not applicable for prescribing or dispensing of Schedule V nonopioid controlled substances
  - Not applicable if the system is down or a temporary electrical failure
- If the PDMP is not checked the prescriber is limited to prescribing or dispensing a 3 day supply
- A person who willfully and knowingly fails to report dispensed data to the PDMP commits a misdemeanor of the first degree
- Failure to query the PDMP may result in citation
- Allows for PDMP data sharing with other states
- Allows for interconnectivity with prescribing and dispensing systems
- Adds Schedule V drugs that have to be reported to PDMP
- Adds or revise certain drugs in the scheduling of CS
- Clarifies that CS prescriptions can be electronically prescribed
- New data information to be reported to PDMP
  - Phone # of patient
  - Note whether new Rx or refill Rx (include # of refills ordered)
  - Name of person picking up Rx
  - Type and issuer of ID provided
- Penalties for providing a medically unnecessary controlled substance to a patient by fraud, misrepresentation or other deception is now a second degree felony
- Second degree felony is punishable by \$10,000 fine and 15 years in prison
- Possessing tableting and encapsulating machines to make controlled substances are prohibited unless you are a pharmacist or pharmacy<sup>2</sup>

### **WHAT DOES THIS MEAN FOR PHARMACISTS AND PHARMACIES?**

Pharmacists will be required by law to consult the PDMP system and review the patients history before dispensing any controlled substances with the exception of patients under the age of 16 and also non opioid schedule V drugs. This requirement does not apply if the PDMP is nonoperational or cannot be accessed by the pharmacy due to technological or electrical failure. If the pharmacist does not consult the PDMP there needs to be documentation in the patient's prescription record the reason why. If the PDMP is not consulted then the pharmacist must not dispense greater than a 3 day supply. Patients being treated with prescribed medications for

---

<sup>2</sup> The FPA worked to make sure that pharmacies were exempt from penalties for tableting and encapsulating machines.

acute pain for opioid C-II prescription medications for greater than a 3 day supply (but not more than a 7 day supply) must have the words “ACUTE PAIN EXCEPTION” on the prescription. Patients that are being treated for pain other than acute pain must have noted on the prescription “NONACUTE PAIN” for opioid Schedule II drugs. Patients that are being treated for trauma with a pain severity index of 9 or greater will receive a narcotic antagonist however HB21 is silent on whether there is an obligation for a pharmacist to fill such prescriptions.

There is also new information required for pharmacies to report to the prescription drug monitoring program. This new information includes, the phone # of the patient, whether the drug being dispensed is a new prescription or is a refill and also the name of person picking up the prescription. Pharmacies may also have the ability to query the PDMP databases of other states when this law takes effect and the connections are made. Pharmacies will also notice changes in the PDMP database provider along with enhancements that will allow for integration of the PDMP system to pharmacy dispensing software.

### **New Institutional Class III Pharmacy Permit**

HB675 sponsored by Representative Jason Brodeur (Rep – Sanford) was filed that created a new class III pharmacy permit. This new class III permit is a modifier of an existing institutional pharmacy permit. This new class III permit is designed for hospital affiliated institutional pharmacies including central distribution facilities that provide the same services authorized by a class II permit. The bill exempts class III permit holders from having to obtain an additional permit from the Department of Business and Professional Regulations to distribute medicinal drugs or repackaged drug products between entities under common control. This bill also exempts hospitals that participate in the 340B drug discount program from having to obtain a restricted prescription drug distributor permit when arranging for a prescription drug wholesale distributor to provide prescription drugs covered under the 340B program to their contracted pharmacies. There is also a provision in HB675 that allows the Governor to appoint a pharmacist currently engaged in the practice of pharmacy in a class III institutional pharmacy to the Florida Board of Pharmacy.

### **WHAT DOES THIS MEAN FOR PHARMACISTS AND PHARMACIES?**

This bill will eliminate the need for class II institutional pharmacies from having to obtain additional permits from the Department of Business and Professional Regulation and is an attempt at deregulation. The bill also allows pharmacists working in these permits to be eligible for a seat on the Board of Pharmacy. The bill does not increase the number of pharmacists on the Board.

### **PHARMACY BILLS THAT DIED OR WERE WITHDRAWN**

There were no less than 33 different pieces of legislation that was filed this year that got the attention of FPA advocates. Some were directly related to pharmacist and pharmacy services while others had the potential to have some impact on our industry. On occasion there will be a

bill filed that is so disliked by our members it could distract us from our proactive agenda to press for changes beneficial to Florida consumers and the profession of pharmacy. Our members need to be reminded that the majority of proposed legislation introduced rarely get underneath the Governor's pen. If you review the vast list of bills and their final disposition you will see that a large number never even got a chance for a hearing. For the most part bills that were the priority of the senior leadership of the House and Senate generally are given a fair opportunity for a hearing. Below are the key bills that we were monitoring that did not pass the 2018 legislative session. We are sharing this information with you as in many cases these proposals or a similar format is reintroduced during future legislative sessions.

### **Remote Dispensing Legislation**

SB848 and HB679 were filed to create a change in the pharmacy practice act that would allow for a facility to be operated by pharmacy technicians and remotely supervised by a Florida licensed pharmacist off site. Language in these bills if adopted by the legislature would have;

- Created a new pharmacy permit for remote dispensing
- Included in the term remote dispensing as a location where prescription drugs are compounded or dispensed by a registered technician who is supervised electronically by an offsite pharmacist
- Allowed for a remote dispensing pharmacy to operate without a pharmacist being present
- Allowed a registered pharmacy technician to compound and dispense medicinal drugs if supervised electronically
- Removed violations and penalties for anyone who operates a remote dispensing pharmacy and a pharmacist is not present
- Removed violations and penalties for anyone who is working as a registered technician in a remote dispensing pharmacy and a pharmacist is not present

This legislation was not supported by the Florida Pharmacy Association. House and Senate sponsors applied several amendments to the bills at our request however the proposals were still considered problematic. Ultimately the time ran out and the bills were never fully adopted.

### **Pharmacist Collaborative Practice**

SB914 sponsored by Senator Rene Garcia (Rep – Hialeah) and H689 sponsored by Representative Cord Byrd were filed to clarify enhanced services that could be provided by Florida licensed consultant pharmacists. A collaborative practice agreement (CPA) is between a doctor and a pharmacist who work within the context of a defined protocol that specifies what function of patient care a prescribing physician delegates to a pharmacist.

Under the proposed legislation, a CPA would have:

- Allowed pharmacists to monitor medication therapy and patient outcomes

- Defined a pathway for pharmacist provided patient assessments, initiate, modify, or discontinue medications
- Allowed pharmacists to administer medications in any health care facility, including a pharmacy
- Included a feedback loop that ensures the pharmacist updates and notifies the physician any time action is taken with a patient

This FPA supported legislation passed all House committees and adopted by the Florida House on a 113 to 0 vote however the Senate version never got a hearing in its first committee and will not be signed by the Governor.

### **Pharmacist Testing and Treating of Influenza and Streptococcus**

SB524 sponsored by Senator Brandes and HB431 sponsored by Representative Plasencia was filed to allow pharmacists to test patients and treat them for influenza and streptococcus infections under a written protocol agreement with a Florida licensed practitioner. The bill was referred to three committees in the House and the FPA was successful in getting one committee reference removed to get it to the House floor faster. Unfortunately the bill was never heard in the final House Committee and did not get an opportunity to get a fair hearing in the Senate. These bills were filed to help expedite therapy for patients during what the FPA found was a very active flu season. These bills could have helped patients get needed care from their community pharmacy rather than having to visit already crowded emergency rooms of hospitals.

### **Expansion of the Cancer Drug Donation Program**

SB710 and HB291 were filed to expand the current cancer drug donation program. The Drugs, Devices and Cosmetics division of the Florida Department of Business and Professional Regulation oversees a program that allows for the issuing of donated previously dispensed cancer drugs. These bills were filed in an attempt to expand the program to all prescription drugs. The bill passed the Senate but only passed one committee in the House.

### **Proposed Revisions to Pharmacist Dispensing Requirements**

SB1372 and House bill 605 were filed to prohibit a pharmacist from dispensing certain opioid drugs unless the container includes a special sticker approved by the Department of Health. This bill also would have required pharmacies to offer for sale to consumers a special prescription drug lock box and include signage indicating that these lock boxes are available in the pharmacy. The Department of Health would have been required to develop a written pamphlet that includes public awareness educational information on controlled substances. If the Department of Health were to provide these pamphlets and make them available to pharmacies then there would be a requirement to offer them to consumers at no charge. Both bills died in committees.

### **Pharmacist Collaborative Practice**

SB714 and HB143 were filed to prohibit health plans from restricting a patient’s choice of provider. These bills would have allowed any provider who is willing to accept the terms and conditions of a contract to participate in networks. This is similar legislation that we have seen filed over the past several sessions. Neither of these bills had an opportunity for a hearing and will not get to the governor for signature.

### Mandatory Mail Order Restrictions

SB492 by Senator Rene Garcia (Rep – Hialeah) and HB289 by Representative Holly Raschein (Rep – Key Largo) was filed to prohibit health plans from requiring mandatory mail order for patients being treated for HIV infections, epilepsy, hypertension or diabetes. The Senate version was found favorable by the Banking and Insurance Committee and also the Senate Committee on Health Policy but advanced no further. The House version was amended in the House Health Innovations Committee in January that limited the bill to just patients being treated for HIV. The bill was never heard in any other committees. This legislation was similar to bills filed during the 2017 session. These bills died in committee and will not get to the Governor for his signature.

### Consumer Protection from Nonmedical Changes to Prescription Drug Formularies

Legislation was filed during this session that mimicked similar bills during the 2017 session that dealt with PBM formulary switching. SB360 and HB229 were filed to prohibit changes to prescription drug policy formularies with some exceptions. Last year the Senate version of this bill passed however the House version managed to get only past one committee. This year neither bill got a single hearing in committee and will not be presented to the Governor for signature.

### Department of Health Changes and Automated Dispensing

House bill 1047 sponsored by Representative Julio Gonzalez (Rep – Venice) to address some policy changes recommended by the Department of Health. On February 20<sup>th</sup> the bill’s sponsor added to the bill a late filed amendment related to pharmacy. The bill was originally about 60 pages long and with the delete-everything amendment the proposed legislation grew to almost 90 pages. His amendment added a lot of concerning language for an array of practitioners, including pharmacists. The bill would have allowed automated dispensing machines for outpatient use. While this amendment couldn’t be stopped in the House, we worked with the sponsor of the Senate companion, Senator Grimsley, to ensure she would refuse to take that language. In the end, HB1047 died before passage.

## Comprehensive Bill List

Sorted by Bill Number		
<a href="#">SB 8</a>	Controlled Substances	Benacquisto

Controlled Substances; Prohibiting managed care plans and their fiscal agents or intermediaries from imposing certain requirements or conditions on recipients as a prerequisite to receiving medication-assisted treatment (MAT) services to treat substance abuse disorders; authorizing certain boards to require practitioners to complete a specified board-approved continuing education course to obtain authorization to prescribe controlled substances as part of biennial license renewal; authorizing disciplinary action against practitioners for violating specified provisions relating to controlled substances; prohibiting the dispensing of certain controlled substances in an amount that exceeds a 3-day supply or a medically necessary 7-day supply if certain criteria are met, etc. APPROPRIATION: \$53,555,360.00 Effective Date: Except as otherwise expressly provided in this act, this act shall take effect July 1, 2018

PCB COM 18-01 -- Workers' Compensation

11/7/2017 HOUSE On Committee agenda - Commerce Committee, 11/14/17, 1:00 pm, 212 K

11/14/2017HOUSE Submitted as Committee Bill with 1 amendment by Commerce Committee; 18 Yeas, 8 Nays

11/17/2017HOUSE Committee Bill filed as HB 7009

The above issues are most of the many bills that we were monitoring or working on during the 2018 session. Other issues including links to voting activity by members of the House and Senate are published on the FPA web site at <http://www.capwiz.com/pharmview/issues/bills/>. We are

pleased that we were able to move our PBM bill through the process. It is not the end of the road for that issue and it is anticipated that FPA leadership will be examining our advocacy plan for the 2019 legislative session for further opportunities. A full report will be made available at the 2018 FPA convention in Bonita Springs. Consider adding to your calendar to attend that meeting on July 11 – 15, 2018.
