

Dear Folk Alliance International Members and Stakeholders:

FAI and the Recording Academy are teaming up to **support the most important music legislation since the 8-track tape era.**

The historic [Music Modernization Act](#) is waiting for a vote in the Senate. The comprehensive package that benefits all music creators has unanimously cleared the House of Representatives and the Senate Judiciary Committee, but the Senate needs to hear from more citizens to ensure a vote on the bill.

Many Senators have yet to hear from their constituents—local music creators—on the bill, and have thus not signed on as a co-sponsor. We need to change that. As an FAI member, you are encouraged to contact your Senators to support the bill!

[Click this link](#) to ask your Senators to co-sponsor the bill. If they are already a co-sponsor, a thank you letter will automatically be generated and sent to their office.

The Music Modernization Act brings outdated laws into the 21st century, ensuring fair pay and better protections for songwriters, artists, producers, and engineers. It is a consensus-driven bill that stands to benefit all of our members.

[Let your Senators know that you want them to support the Music Modernization Act!](#)

Sincerely,

Aengus Finnan
Executive Director
Folk Alliance International

and

Daryl P. Friedman
Chief Industry, Member and Government Relations Officer
Recording Academy
