

Forensic Nursing - Excellence

Christi LaPrairie

Mayfield Hts, Ohio

**Work Setting: Coordinator of Forensic Nursing Services,
Cleveland Clinic Hillcrest Hospital**

Christi worked to bring appropriate strangulation assessments to the forefront of the providers in our ED. She was able to work with the ED to get order sets put in place for the providers that prompt the appropriate assessments and care path . It also provides that provider with the knowledge to appropriately classify the non-fatal strangulation. Since the orders sets have been in place our forensic nurses have been appropriately consulted on the strangulation patients helping us to assure that the patient receives the appropriate recommendations and the appropriate strangulation discharge instructions.
