FIND PSYCHOLOGISTS IN THE COMFORT OF YOUR HOME

GEORGIA—March 5, 2012. With the occurrence of recent natural disasters, the current economic climate, increasing gasoline prices and a stagnant housing market, Georgia residents are reminded that the Georgia Psychological Association (GPA) is a resource for those who are searching for therapy and counseling from qualified psychologists.

GPA's website contains a complimentary referral system with psychologists all over the state of Georgia. The public has the ability to search by specialty, location, insurance types and more. The online referral system is anonymous and accessible at any time from the comfort of your home.

Other resources available online include public education articles, research articles and press releases. GPA is the sponsor of the annual Mind/Body Health Fair as well as the Psychologically Healthy Workplace Awards.

Visit www.gapsychology.org and click the 'Public' tab to access these resources.
