You are invited to participate in the **Clean Energy Virginia Five-Part Webinar Series** hosted by Governor Ralph Northam’s Office and the Virginia Department of Mines, Minerals and Energy (DMME). The focus of the webinar series is on recent legislation that creates advantages for clean energy businesses to expand or locate in Virginia. Please join us for these highly educational sessions.

For more information, please contact Jordan Burns, jordan.burns@dmme.virginia.gov (804) 786-7900

### Webinar 1: Clean Energy Virginia - Energy Efficiency

*Learn about the energy efficient components of the Virginia Clean Economy Act. Specifics surrounding support for energy efficient affordable housing and Virginia’s participation in the Regional Greenhouse Gas Initiative (RGGI) will reveal the opportunities to increase economic resilience for all Virginians.*

**Date:** July 22, 2020, 1:00-2:30 p.m.

### Webinar 2: Distributed Generation Solar

*Get an overview of the Virginia Clean Economy Act (VCEA) and details of the distributed generation solar components. Topics include increase in net energy metering caps, opportunities for third party power purchase agreements and reduced barriers for rooftop generation solar components of 2020 legislation. In addition, presenters will discuss models underway to offer solar energy financing for low to moderate income households, including shared solar at multifamily facilities.*

**Date:** July 29, 2020, 1:00-2:30 p.m.

Learn about the ambitious renewable energy goals within the Virginia Clean Economy Act (VCEA) and associate bills that will transition Virginia’s energy landscape by mid-century. Utility scale solar and onshore wind components of the VCEA as well as renewable energy credits and deficiency payments will be discussed. Attendees will also receive an overview of state-level permitting and a breakdown of energy equity programs to ensure clean energy to all Virginians.

**Date:** August 5, 2020, 1:00-2:30 p.m.
