

Assessing Your Protection of Personal Identifiable Information (POPI)

Duration: 2x4 Hours Sessions

CPD: 8

LEVEL: 1,2,3,4

TOPICAL ISSUES

One of the unintended consequences of the information age is the availability of personal Identifiable information (PII). The combination of name, date of birth, and identification number are the “keys to the kingdom” for the purposes of establishing false identity and fraud. Lost laptops, network break-ins, and phishing expeditions have led governmental entities to establish a patchwork quilt of laws requiring custodians of personal information to provide safeguards and assurance that PII is secure.

In this course, we will discuss:

- PII scope and definitions.
- State and federal PII requirements.
- An action plan for compliance

COURSE CONTENT

- What Is Personal Identifiable Information (PII)?
 - o Various definitions
 - o Minimum requirements
 - o Dynamic framework by locality
- The Need for Security Over PII
 - o Performing a meaningful risk assessment
 - o Selling the results to management
 - o Overcoming “not just security”
- Where to Find PII
 - o The porous nature of data storage
 - o Traditional computing
 - o Outsourced systems
 - o Keeping up with changing technology and compliance
 - o Monitoring and assurance

- Action Plan
 - o Building a framework for PII
 - o Aggregating compliance requirements
 - o Implementing security measures

Day 1 Session 1 – 08:30 to 12:30

- POPI Background
- Why is POPI Act Important?
- What is Personal Information and Where to find it?
- Data Subjects whose Personal Information should be protected

Day 1 Session 2 – 13:00 – 17:00

- Eight Conditions of the POPI Act
- Other Requirements of the Act
- The need for Security over Personal Information
- What do we need to do?
 - o Data on the move
 - o Into the cloud
- What Do We Need?
 - o Establishing criteria
 - o Defining the compliance universe
 - o Identifying the legal requirements
 - o Fulfilling assurance/monitoring requirements Resolution
