on Innovation**
The Jefferson Hotel
Richmond, Virginia

The Governance Institute's education programs and resources are designed to support Intentional Governance, a high-performance board development framework we created that helps boards become more effective, efficient, and agile.

Our 2019 Education Agenda focuses on key issues affecting all of our members, and drives our conference programming, publications, online learning, and Webinars throughout the year.

In addition to the key areas of focus represented in the graphic on the right, the following education topics will be addressed in 2019 programs and publications through our **Governance Learning Cohorts:**

Children's Hospitals:

- Create opportunities for value-based payment models
- Collaborate rather than compete to advance population health and tackle social determinants
- Develop consumer-centric strategies for engaging parents and patients

Systems:

- Achieve self-actualization through integrated, streamlined, and aligned system governance
- Ally with payers to be the change
- Accelerate innovation and collaboration, within the organization, in the community, and beyond

Independent Hospitals:

- Attract top talent for new leadership in the C-suite
- Build a younger, more diverse, and agile board
- Future vision: sustainability and partnership strategies

Public Hospitals:

- Develop board members into a high-reliability leadership team
- Play a critical role in managing population health and improving community health
- Consider strategic growth opportunities

Subsidiaries:

- Progress community and population health
- Build system brand loyalty through local connection
- Execute role and purpose with clarity

Academic Health Centers:

- Meet the challenges posed by disparities, inequities, and vulnerable populations
- Increase value despite obstacles
- Leverage university, medical center, and physician leaders to achieve triple-mission strategic goals

Rural & Critical Access Hospitals:

- Find digital and mobile health solutions to bridge gaps
- Build collaborations to share resources and achieve goals
- Transform the business model to coordinate care and improve access to optimum care settings

Governance education that fits your needs

Ongoing governance education is available throughout the year via our conferences, publications, online learning, Webinars, videos, and customized education solutions. In-depth original research, tools, board self-assessments, and industry-leading conference speakers form a cohesive curriculum to help all healthcare leaders—board members, senior executives, clinical leaders, and governance support professionals—perform at their highest levels.
