21ST Annual Meeting
San Diego, CA
June 2007
HAPS Leadership

Joseph Griswold  Rick Martini  Margaret Weck

Kevin Petti
Welcome Reception Sunday
(Sponsored by McGraw-Hill Publishers)
30 Posters were on display
Update Seminars – Sunday and Monday

Topics

- Applied surgical anatomy of the shoulder with Arthroscopic Correlation
- Homeostasis and Psycho-Neuro-endorino-Gastro-Immunology
- Renal system Physiology Update
- Oxygen Transport and Utilization: An Integration of the Muscle Systems
- The Biology of Aging
Checking out the Vendors
Exhibitors & Sponsors

- A.D.A.M
- ADInstruments
- American Association of Anatomist
- American Physiological Society
- American Society of Microbiology
- Anatomy in Clay
- Benjamin Cummings
- BIOPAC Systems
- Biovere
- Bones Clones
- bluedoor
- Carolina biological Supply co.
- Denoyer Geppert
- Hayden-McNeil Publishing
- Holt Anatomical
- Imagineering Media Services
- Institute for Plastination
- iWorx/CB Sciences Inc.
- Jean and Richard Faircloth
- John Wiley & Sons Publishers
- Kendal/Hunt Publishing
- McGraw-Hill
- Morton Publishing
- Mosby/Saunders – Elsevier
- Novus Publishing
- Overhead Camera systems, Inc.
- Touch of Life Technologies
- Lippincott Williams & wilkins
Sunday Evening Dinner on the USS Midway
Reception & Banquet (Monday Evening)
Banquet speaker
Dr. Angelina Whalley
BODY WORLDS
Designer
Some Famous Physiologists were noticeably absent from the conference.
But the four Okies were there!

Ryan  Jim  Karen  Craig
Last two days (Tuesday and Wednesday)
Over 40 Workshops – Hosted by Miramar College

Lunch sponsored by ADInstruments
Clinical thinking: Semester-Long Laboratory Exercise Requiring Critical Thinking

Advanced Renal Physiology Workshop
Arterial blood Gases Made Simple Workshop

Continental Breakfast sponsored by A.D.A.M. and Miramar College
Dead Men DO tell Tales: An Introduction To Determining Age And Sex Of The Human Skeleton Workshop
Plastination Workshop
Tour of Miramar’s Cadaver Lab

Kevin demonstrating a knee joint anatomy
Fun with Plasticized Specimens
HAPS Institute (HAPS-I)

The first of the HAPS-I continuing education programs kicked off at the 21st HAPS conference. HAPS-I offered two pilot courses, partnered with the University of Washington, to provide graduate credit to participants.

- Topics in Anatomy & Physiology
- Advanced Renal Biology
HAPS Institute (HAPS-I)

Advanced Renal Physiology Course
The Human Anatomy and Physiology Society (HAPS) serves to promote excellence in the teaching of anatomy and physiology. HAPS is open to anyone interested in Anatomy & Physiology Education, and currently includes over 1,200 members from two and four year colleges, universities, high schools and private businesses throughout the United States, Canada and the rest of the world.
Goals:

- To enhance the quality of human anatomy and physiology instruction at colleges, universities, and related institutions.

- To promote and facilitate communication and collaboration among teachers of human anatomy and physiology.

- To encourage innovation, educational research, and publication by human anatomy and physiology teachers.

- To promote and organize professional development programs for the teaching of human anatomy and physiology.
Goals:

- To promote interaction among science teachers at all educational levels.

- To provide the membership with opportunities to become and remain informed about the latest developments in the health/science field.

- To facilitate communication with other sectors of the educational and scientific community and to collect and disseminate to the membership information regarding events of interest.

- To foster a sense of collegiality and camaraderie among members
Some other HAPS Services and Activities

- Affiliate membership with APS, AAA, & other organizations
- Cadaver Lab setup committee
- HAPS Comprehensive Exam
- Lab Safety committee
- Grants and Scholarships
- Public Affairs Office
- HAPS-Educator (Official Publication)
Future HAPS Annual Conferences

- HAPS 2008 – New Orleans

- HAPS 2009 - Baltimore Inland Harbor
