President's Message

Mark Rochon

2026

Welcome to the Eastern Section Meeting in Danvers MA. I, Mark Rochon am honored to be elected President of the Eastern Section IAEI for the 2026 year! I look forward to where the section leads us this year.

I have been married to my wife Donna for 41 years this year. We had an 8 year engagement. We have 3 children Kristine, Kimberly and Scott, and 3 grandchildren Kelsey, Nathan and Tyler. We were just getting out of high school when we started dating in 1977 / 78 and she was there with me while I studied for my license right through to my masters. She would sit with me in my basement and ask me the code questions and clean my fish tank while I studied. That 20 gallon fish tank grew into being a 120 gallon fish tank when we got married and I have to give her the credit – she still cleans it! When I joined IAEI in 1982 she went to all section meetings and code seminars and still does.

I obtained my first Electrical License in Mass and NH in 1982, and my Master Electrician License for Mass and NH in 1983. I became a certified instructor in 1994 and certified wire inspector in 2001 and am still active in both. I became a member of the IAEI in 1982. I have a distinguished background in the electrical industry with years of leadership with significant experience and knowledge in all aspects of industrial, commercial and residential wiring. I bring to you my many years of accuracy and commitment to safety and sustainability initiatives. My vision focuses on safety, quality, commitment and strengthening member engagement to meet the evolving demands of the electrical industry and succeed in this rapidly evolving industry.

I attend monthly meetings with Paul Revere Chapter of IAEI and Municipal Electrical Inspectors Association MEIA, Eastern Section IAEI yearly code seminars and inspector training requirement every cycle. Also required mandatory 15 hours of continuing education, 6 hours of professional development, 6 hours inspector of wires board approved continuing education, and New Hampshire chapter 319-C licensing concerns and installation deficiencies.

I feel it is important to keep up with the code and any changes. I attend code seminars frequently to be in compliance with all changes in the NEC and to further all dependability and knowledge as Wire Inspector, Master Electrician and Instructor. The seminar is also a great opportunity to get involved with a group with exceptional knowledge who are always willing to step up. Always put a question out there if you have one because there is always someone who can not only give you an answer but also give you the explanation or reason for that answer.

Being a member for all these years has made IAEI family to me. I look forward to attending the section meetings and engaging with our knowledgeable instructors, vendors and members old and new exchanging expertise and the opportunity to learn even more.

We have a great program for all. I am looking forward to sharing our instructors and vendors expertise and entertaining you at this years 2026 IAEI (Independent Alliance of the Electrical Industry) seminar at the Double Tree in Danvers MA. The companion program will also be a great adventure anticipating the main trip to an event in historic Salem.

Reach out to the men and women you associate with in the field and share what they are missing – encourage them to join a chapter, sign up for a seminar, get involved! It is an opportunity they should be encouraged to participate in. They will never know what they are missing unless "WE" get them involved!

IAEI President/CEO

Doug Carlson

IAEI Eastern Section,

It is a great honor to introduce myself to you and your fellow IAEI members. We come together to learn, grow, and share knowledge that strengthens both our profession and our industry. As the new President/CEO of IAEI, I am excited to work alongside you as we continue advancing electrical safety and prepare to celebrate our organization's 100th anniversary.

As I write this, I have had the privilege of contributing two messages for the IAEI Newsletter and IAEI Magazine—one focused on safety and the other on membership. These two topics are at the heart of our mission.

Safety is the foundation of everything we do. As industry leaders, we have both the opportunity and the responsibility to share knowledge, promote best practices, and foster a culture that protects the people who work with electricity every day.

Membership is equally important. A strong and engaged membership gives IAEI a stronger voice and greater influence. It provides the resources to expand training, enhance safety initiatives, support research, and deliver even greater value to the electrical industry. Simply put, the stronger our membership, the greater our impact. My request to you… recruit 1 new member. Be a +1 Champion.

Together, let's build the next 100 years of excellence in electrical safety. Charge Forward and as always, put safety first!

Onward & Upward,

IAEI Chairman of the Board

David Humphrey

David is an electrical plan reviewer in Henrico County Virginia. David and his wife Nancy live in Midlothian VA. where they raised a son Nathan, and daughter Elissa. In April of this year Elissa and her husband Noah welcomed their first child, David and Nancy's first grandchild into the world. A healthy baby boy named Zechariah. Both David and Nancy enjoy traveling and spending time with their new grandson.

David began his career in the electrical industry in 1978 as an apprentice in the central Virginia area. After completion of his apprenticeship David earned his certification as a licensed Journeyman and Master electrician. In 1988 David went to Henrico County Virginia as an Electrical Inspector. In 1995 David was promoted to the position of Senior Electrical Inspector and in 2005 promoted again to Electrical Plan Reviewer the position he currently holds.

David has been active in IAEI since 1989. Serving as the President of the Virginia Chapter in 2003 -2004 and as Chapter Secretary/Treasurer from 2009 to 2015. Additionally, David served on the Board of Directors for the Southern Section from 2006 to present. David served the Southern Section as Chairman of the Board from 2008 to 2024 and as Section President from 2016 to 2017.

David served as a member of the NCPCCI electrical exam committee from 1999 until 2020 and is currently serving on the ICC exam committee. David has served as a principal member of code making panel 8 for the 2008 and 2011 code cycles, the Chair of code making panel 9 for the 2014, 2017 and 2020 cycles, and the Chair of code making panel 2 for the 2023,2026 and 2029 cycles.

In 2020 David was elected by the Southern section to the International Board of Directors. In 2023 David was elected by the IO Board to Vice Chairman and reelected in 2024. In 2025 David was elected as Chairman of the IO Board of directors.

From the Chairman:

Since joining IAEI as a new member in 1989 it still amazes me what involvement with this organization can do for the career of a member. The education, training, networking and friendships developed along the way are nothing short of amazing. As we approach our 100th anniversary it is clear why IAEI is soon to be 100 years old. It's the dedication of our membership to electrical safety and the camaraderie built among our members.

Looking forward to seeing you all in Forth Worth Texas in 2028.

David G. Humphrey

David Humphrey
Chairman

About IAEI

The Independent Alliance of the Electrical Industry (IAEI) is a 501(c)(6) not-for-profit professional trade association committed to public safety from electrical hazards by providing expert, unbiased leadership in electrical code and standards development and premier education and certification for electrical professionals. IAEI was established in, and has been in continuous operation since, 1928. We educate and equip electrical professionals while unifying the industry to promote electrical safety. Electrical inspectors, multi-hat inspectors, electrical installers and contractors, testing agencies, standards organizations, manufacturers, and distributors all working together to ensure the public safety.
