The literature sits the analyst in the context
of an intellectual and cognitive paradigm

Abilities, skills, attributes and characteristics

In excess of 66 noted in the literature:

Open/tolerant to ambiguity

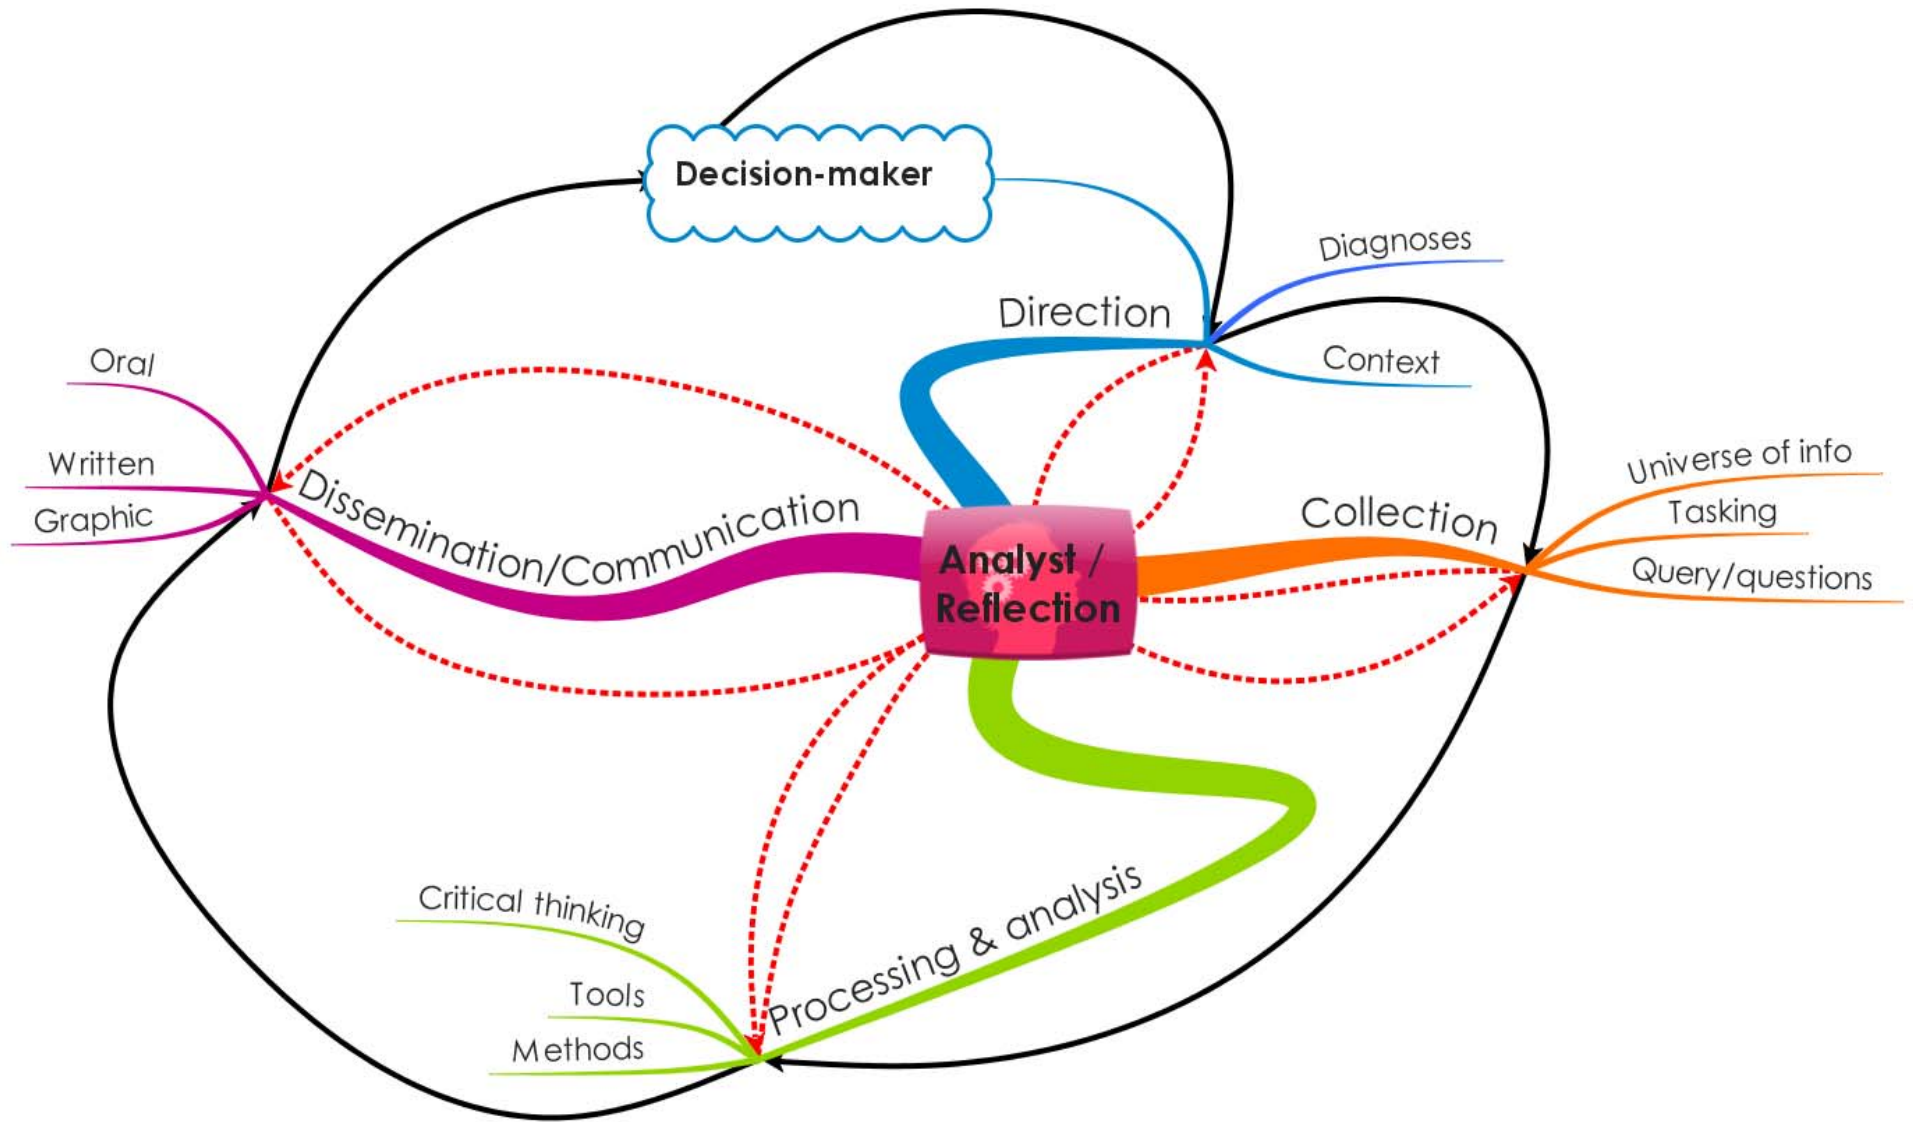

Curious Creative

Cross cultural awareness

Critical thinkers Reflective

Outstanding communicators

Problem diagnoses & solvers

Why diagnoses and communication?

The Analyst

Diagnose the decision-makers need, make sense of the complex, and communicate the outcome such that the decision-maker is able to make an optimal decision
