Dr Ian Wing | The Emirates Center for Strategic Studies and Research
Dr Caroline Ziemke-Dickens | Intelligence and global security analyst, Wellington, New Zealand
Aims

The AIPIO Journal is a refereed publication dedicated to the advancement of the discipline of intelligence studies. The Journal aims to be a medium for professionals and scholars to exchange views on contemporary issues in Australian and international intelligence practice.

The Editorial Committee welcomes contributions related to all aspects of intelligence theory and practice and/or studies in the application of intelligence in related disciplines (e.g. intelligence and terrorism or intelligence and peacekeeping).
Scope

The Journal seeks to encourage a broad cross fertilisation of ideas from all AIPIO members and non-members working in the field of intelligence. Research and thematic articles relating to different practice contexts such as national security, law enforcement and business intelligence are welcome. Synopses of professional/workplace projects backed by appropriate references, conference papers and research contributions from University students and postgraduates in the field of intelligence are also welcome.

The Journal is an independent, non-partisan forum. It seeks to disseminate the diverse findings of its contributing authors and does not advocate positions of its own.
