Dear ICA Mass Communication Members,

This is the "All Things Media" newsletter for May 2024.

The news of this month can all be found below:

1. ICA Pre-Conference "The Future of Computational Message Science: Theoretical Advances, Computational Frontiers, and Grand Societal Challenges"

2. Peer-reviewing survey

Feel free to always contact me with any news you’d like me to share in the next newsletter. Please don’t hesitate— we are excited to know about calls for papers/book chapters/etc., calls for nominations/applications for awards, and much more! If you have any news to be included in the upcoming newsletter, please email me at isabelle.freiling@utah.edu.

Isabelle Freiling

1. ICA Pre-Conference "The Future of Computational Message Science: Theoretical Advances, Computational Frontiers, and Grand Societal Challenges"

June 19, 2024 (8:30am - 17:00pm) local time at Queensland University of Technology in Brisbane (2-hour train ride to the ICA main conference venue)

Registration is open until May 15, 2024 (AOE): https://www.icahdq.org/event/computational-msg

No papers needed for participation! Join leading scholars and fellow participants for a whole day’s focused discussion on the frontiers of cutting-edge computational methods applied to advance theories and practices concerning message effects, broadly defined as the production, reception, and retransmission of multimodal content situated within both evolving social dynamics (e.g., deepening inequalities, political polarization) and technological innovations (e.g., generative AI).

For more information, see: https://sites.google.com/northwestern.edu/ica2024cmsprecon

2. Peer-reviewing survey

A large-scale survey has been launched about peer reviewing practices in social sciences and humanities across the world; with also a specific interest in Communication and Media Studies. Help us (Mark Boukes and colleagues) by taking the survey, and spreading the word to your colleagues in other departments, institutions, and countries! The survey is open to all scholars at all career stages, and is fully anonymous: https://www.peerreviewstudy.com
