Travis L. Dixon was recently promoted to full professor in the Department of Communication at the University of Illinois at Urbana-Champaign. He also continues as the Communication Alumni Professorial Scholar.

Jenny Korn is now a Fellow at The Berkman Klein Center for Internet and Society at Harvard University.

Bryan Denham, Campbell Professor of Sports Communication and chair of Clemson’s communication department, writes in a series of journal articles that the problem often lies in the inclusion of methylhexaneamine, or DMAA, an amphetamine derivative banned by the World Anti-Doping Agency (WADA). Denham’s work, featured in the International Journal of Sport Policy and Politics, explains that athletes might enjoy an energy boost from DMAA-spiked products, but the presence of DMAA can result in a suspension from a World Anti-Doping Agency-regulated competition.
The Department of Communication Studies in the J. William & Mary Diederich College of Communication at Marquette University invites applications for a tenure-track position for an assistant professor with a teaching and research specialization in health communication.

The ideal candidate will assist the Department of Communication Studies in developing new course offerings and related programs in health communication. We seek a candidate who will collaborate across the University with other health-oriented programs. Knowledge of health issues for ethnic populations is a plus for targeted communication campaigns. Other areas of interest or expertise could include: a) health care disparities in underprivileged populations; b) end-of-life/palliative care; c) loss and grief communication; d) doctor/patient communication; e) doctor-to-doctor communication; f) social support; g) health information technology; and h) communication related to various health contexts. A candidate with a strong quantitative methodological approach to research paired with demonstrated success or high potential for securing extramural funding (e.g., grants and contracts) is preferred. The candidate will have the expectation of teaching courses such as health communication, research methods, health campaigns, and other courses in her/his area of expertise at both the undergraduate and graduate levels. In addition to teaching, the candidate will be responsible for advising undergraduate and graduate students, serving on college and university committees, and establishing and maintaining a research agenda.

Application Procedure: (on-line applications only)
Before electronically submitting your materials be advised to review the application process at Marquette University’s Career Website: https://employment.marquette.edu/

Applications must include:
1. A cover letter that addresses interest in and qualifications for the position, including a statement explaining how the candidate’s teaching and research will contribute to the College,
2. A curriculum vitae,
3. Evidence of teaching effectiveness,
4. Names and contact information for three references.

For more information, contact Dr. Scott C. D’Urso, scott.durso@marquette.edu, Chair, Department of Communication Studies, 1131 W. Wisconsin Ave., Milwaukee, Wisconsin, 53233.

Review of applications will begin on Oct. 9, 2017 and will continue until the position is filled. Priority will be given to applications received prior to November 9, 2017.
The Wee Kim Wee School of Communication and Information (WKWSCI) and the psychology program at the School of Social Sciences (SSS), Nanyang Technological University, invites applications for a postdoctoral research fellow. The successful candidate will be based in the laboratories of Dr. Benjamin H. Detenber, WKWSCI, and Dr. Joyce S. Pang, SSS. We aim to support a highly promising scholar with a background in psychology, communication, or related disciplines. The scholar's research expertise should engage with the intersection between social, personality psychology, and computer-mediated communication, and could touch on topics such as intergroup processes, group dynamics, cyberpsychology, among others.

The successful applicant will be expected to oversee a project examining factors in online interactions that influence group identity and behavior. It is expected that the successful applicant will be involved in a number of critical tasks, including:

- draft IRB applications;
- design and execute online surveys;
- design and run controlled experiments with human subjects;
- analyse data and write-up findings for publication;
- supervise undergraduate and graduate research assistants;
- assist in grant-related paperwork and liaisons with the funding agency;
- assist in the development of a content-coding system for online social interactions.

**Qualifications**

Applications are welcome from candidates who have or expect to have a Ph.D. by the preferred start date, January 1, 2018. They may not be employed by another institution during the term of their appointment.

Ideally, applicants should have strong verbal, organizational, and analytical skills, and be familiar with the cultural context of Singapore. Some experience with university research administrative is preferred. Good familiarity with methodology and software used (e.g., SPSS, R) in such research is required.

Applications will be evaluated on the basis of the applicant's previous accomplishments, the alignment of the applicant's interest with the proposed research project, and the applicant's ability to contribute to the intellectual life of the programs in WKWSCI and SSS, and Drs. Detenber and Pang's laboratory group.

**Term of Appointment**

The term of appointment is 1.5 years, beginning early 2018. Applicants are expected to be in residence for the duration of the appointment. Nanyang Technological University offers competitive salary and employee benefits.

**How to Apply**

A complete application will include the following materials:

1. A current curriculum vitae;
2. A representative manuscript or publication;
3. Contact information for three referees, who will be asked to comment specifically on your qualifications for the proposed research project. Referees will be contacted directly by email with instructions for uploading letters of reference.

These materials should be submitted via email either to tdetenber@ntu.edu.sg or joycepang@ntu.edu.sg by November 15, 2017 for full consideration. We cannot accept application materials by any other method. Applications lacking any of the elements listed above may be at a disadvantage. We will continue to accept applications until the position is filled.
