ALL THINGS MEDIA

The nomination period for the Book Awards ends on 13 December, 2019. For more information, visit ICA Awards.

A special thank you to everyone who reviewed submissions for ICA 2020. We thank you for your service to our division.
Position Title: Assistant Professor in Multimedia/ Digital Media Production

The Department of Communication and Media invites applications for a tenure-track Assistant Professor in the area of multimedia/digital media production. The successful candidate will teach four courses a year in multimedia/digital media production, covering areas such as pre-production, production, post-production, studio development, and project management. The holder of this position will also be expected to maintain an active program of peer-reviewed scholarship and/or creative activity. The successful candidate must have a relevant terminal degree (M.F.A. or a Ph.D.).

We are seeking a candidate who can prepare students for careers in the field, stay abreast of trends and development in the field, build ties with the professional community, work effectively with a diverse student body, create an inclusive environment that encourages student learning, and collaborate effectively with faculty in related disciplines. The holder of this position will have the opportunity to contribute to the development of the curriculum in this area and help coordinate part-time faculty with expertise in specific areas. Faculty are expected to advise students and serve on department, college, and/or campus committees.

Applicants should submit a letter of interest, curriculum vitae, statement of teaching philosophy, statement outlining their creative and/or scholarly accomplishments, examples of scholarship or creative work, and three letters of reference. Applicants must apply online at www.umsl.jobs. Review of applications will start on January 13, 2020.

About the Department: The Department of Communication and Media offers bachelor’s and master’s degrees, as well as undergraduate certificates, including one in media production. Areas of focus within the undergraduate program include digital media production, strategic communication, mass communication, and interpersonal communication. The department has about 250 majors. The 14-member faculty include experienced media practitioners, researchers who publish in leading scholarly outlets, and skilled artists who are involved in regional and national productions.

About UMSL: UMSL is a metropolitan research and teaching institution that has an enrollment of about 10,000 students on its main campus. It is one of the four institutions in the University of Missouri land-grant system and is classified as RU-H (high research activity) and as a Community Engaged Campus by Carnegie rankings. It is considered a primary driver of the St. Louis economy, providing industries with educated and capable employees and leaders. UMSL is committed to meeting the diverse needs in the state's largest metropolitan community and, accordingly, is educating traditional and nontraditional students so they are prepared to be leaders in health professions; liberal and fine arts; science and technology; and in metropolitan and international affairs such as business, education and public policy. The St. Louis metropolitan region has a population of about 2.8 million, and boasts vibrant media and arts communities. Both the campus and the College of Arts and Science are committed to an inclusive campus community that values and respects all its members and achieves educational excellence through diversity. We encourage applications from individuals from diverse and minority backgrounds, including individuals with disabilities and veterans.

International Communication Association: Mass Communication
Opportunity to join the AAAS (American Association for the Advancement of Science) team of Civic Science Fellows.

Tasks of the fellow will include:

- Define project focus areas for culture change experiments in the science-society relationship.
- Recruit a small project advisory group of researchers and practitioners that work at the science-society interface to help inform the project direction, outcomes, and recommendations.
- Conduct a landscape analysis to synthesize the available research and practice of relevance to science-society culture change experiments, science communication, and the use of science in American life.
- Conduct literature reviews and qualitative interviews with key leaders in research and practice related to science in society.
- Facilitate a cross-sector discussion on opportunities to positively change the science-society relationship and define metrics for documenting progress.
- Develop recommendations for a set of future experiments that would test the effectiveness of specific interventions and/or the scaling of proven interventions.
- Present a summary of project results and recommendations and develop other dissemination products (e.g., research publications, white papers, website articles, meeting presentations, webinar, etc.) in collaboration with AAAS staff.

Submit a resume and cover letter outlining qualifications and interest in the position by December 31, 2019. For more details on the position and application process, visit this page. The salary for the fellowship is $80,000 per year plus benefits. Minimum qualifications include "Master’s degree in science communication or a related field, or bachelor’s degree with at least 5 years of relevant experience."

AAAS is an Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sexual orientation, gender, gender identity, national origin, age, disability, veteran status, or other protected category. AAAS uses E-Verify to confirm the employment eligibility of all newly hired employees.

International Communication Association: Mass Communication
The National Cancer Institute’s Behavioral Research Program (BRP) invites letters of interest for a Program Director (Health Scientist Administrator) position in Health Communication.

Candidates with experience in any relevant area of health communication and informatics research are welcomed, especially those with expertise in connected health, mHealth, health IT, telehealth, and digital health.

BRP Program Directors have ample opportunities to:
- manage a portfolio of extramural research and develop research priorities to cultivate a diverse portfolio of NCI-supported research
- lead and participate in cross-disciplinary collaborations in public, private, and academic sectors
- conduct independent research, publish, present at professional meetings, and develop scientific programming (e.g., symposia, special journal issues)
- mentor scientific fellows and trainees

Qualifications:
- A PhD, ScD, MD, DrPH or equivalent degree in behavioral science, social science, health services, health policy, medicine, health informatics or related areas
- Experience in behavioral research within the context of health communication and informatics research
- Excellent speaking and writing abilities, including an outstanding publication record
- A history of effective collaborations with scientific peers

Announcement Details: This is a pre-announcement of the vacancy. The anticipated position will be full-time, based in Rockville, Maryland, and likely classified as a GS 13/14. Formal position announcements are posted periodically on www.usajobs.gov, and applications must be submitted there to be considered.

Letters of Interest: Please submit a letter of interest, a CV, and two representative publications to ncidccpsbrpadvances@mail.nih.gov.
