Are you looking to become qualified as a concrete surface repair technician and inspector?

The International Concrete Repair Institute has the program for you!

The ICRI Concrete Surface Repair Technician Certification Program

- Competency-based program using current best practices for training and evaluation
- Includes five online training modules, an online knowledge exam, and performance exam (either video recorded or live at an on-site location)
- Qualifies individual to perform pre- and post-placement inspections and testing

"The ICRI CSRT program has assembled a vast amount of information...an individual can learn best practices that typically take five to ten years to accumulate. Whether you are new to concrete repair or experienced...this program has something for everyone."

Jacob Borgerson, Wiss, Janney, Elstner Associates, Inc., Houston, TX
Certified Concrete Surface Repair Technician-Grade 1
