

IHEA Fall Seminars to be Held in South Carolina

IHEA's popular fall seminars will be held Sept. 19-20 at the Westin Poinsett in Greenville, S.C. These three seminars – Combustion Seminar, Safety Seminar and an updated, half-day Induction Seminar – provide a great opportunity for training and education in the heat-processing industry. Keeping with tradition, there will be a joint tabletop exhibition and reception on Tuesday, Sept. 19, that will include companies from every technology featured throughout the seminars.

Following IHEA's fall seminars, attendees will gather for the Fall Business Conference. The event will kick off with an evening gathering on Sept. 20 and will be followed by business meetings and committee work on Sept. 21.

Visit www.ihea.org for program updates and registration information.

ITPS INTERNATIONAL THERM PROCESS SUMMIT

ITPS 2017 – International Thermprocess Summit

ITPS 2017, the International Thermprocess Summit, will be the meeting point for the

worldwide industrial heating equipment sector June 27-28 at the InterContinental Hotel in Düsseldorf, Germany.

Thermal-processing technology plays a crucial role in determining the properties of individual products and all industrial manufacturing operations. However, a number of global challenges need to be dealt with at the same time: the general economic and political conditions around the world, climate protection, carbon footprint, and energy and resource efficiency.

Friedrich-Georg Kehler, global portfolio director, Metals and Flow Technologies at Messe Düsseldorf, said, "This is precisely what the two-day ITPS focuses on: offering the thermal-processing industry and its stakeholders a customized program. As was the case at the premiere in 2013 and at subsequent events in India in 2014 and in the U.S. last year, we are again expecting high-level decision-makers to participate."

"I am delighted that we have succeeded in creating another highly interesting program that will deal not only with scientific and practical aspects but also with the general global, economic and industry policy conditions," said Dr. Timo Würz, VDMA metallurgy director and member of the program advisory board.

Executives from plant manufacturers and customers' sectors are offered the opportunity to exchange information and discuss relevant strategic topics, including:

- Global challenges and policy impacts
- Economic drivers
- Innovation, digitization and new business models
- Innovative applications of thermal-processing technology in customer industries

The second day of the event will be devoted to "best cases" in the automotive, aerospace and machine manufacturing sectors.

Visit www.itps-online.com for the complete program and registration information. Contact Messe Düsseldorf North America at 312-781-5180 or info@mdna.com for more information about attending or exhibiting at ITPS 2017.

IHEA's popular Combustion Seminar will be held Sept. 19-20 in Greenville, S.C.
