Welcome Standards Superstars!
Standards Consensus Bodies Combined Meeting

Brandon Burton, IICRC Standards Chairman
Howard Wolf, IICRC Standards – Past Chairman
Lee Senter, IICRC Standards Vice-Chairman
Consolidated Glossary

Harmonization of Important Definitions
Cleaning

S500: the process of containing, removing and properly disposing of unwanted substances from an environment or material.

S100: the purposeful activity of removing soil and undesired substances from an environment or surface to reduce damage or harm to human health or valuable materials. Cleaning is the process of locating, identifying, containing, removing, and properly disposing of unwanted substances from an environment or material.

S300: the traditional activity of removing contaminants, pollutants and undesired substances from an environment or surface to reduce damage or harm to human health or valuable materials. Cleaning is the process of locating, identifying, containing, removing and properly disposing of unwanted substances from an environment or material.
Principles of Cleaning

Definition: underlying or supporting doctrines or assumptions which are essential to achieve cleaning.
Contaminated/Contamination

Definition: for the purposes of this Standard, the presence of indoor mold growth or mold spores, whose identity, location, and quantity are not reflective of a normal fungal ecology for similar indoor environments, and which may produce adverse health effects, cause damage to materials or adversely affect the operation or function of building systems. S520
Definition: any undesired substance that is deposited on, or that is foreign to, the construction of a textile material. Soil results from environmental conditions and use (e.g., dust and particles, shed fibers, foods, and oily substances). S100, S300
IICRC Standards: Scope and Purpose

- Serve to develop common, industry-accepted language and terminology that enables us to more universally discuss concepts and procedures regarding cleaning, inspection and restoration.

- Procedural Standards, not Safety Standards
References, Cross References, and Cite Sources

- Reference Regulations for Health and Safety
- Refer to applicable ANSI/IICRC Standards
- Cite references used to develop content in revision
