

Executive Leadership Seminar

Promises and Perils of Law Enforcement Information Technology

Date

September 4-5, 2019

Location

1001 Fire Academy Drive, Sayreville, NJ, 08872

About the Seminar

A case-study oriented seminar to discuss the benefits that current and emerging information technologies can bring to improving law enforcement operations and the challenges that adoption of advanced technologies brings to an agency with ways to mitigate risks. Presented by experienced experts in law enforcement operations and technology.

Intended Audience

This seminar is intended for law enforcement executives in national, state and local agencies and organizations.

Speaker Spotlight

Jim Burch

President, National Police Foundation

Rick Fuentes

Former Colonel and Superintendent, New Jersey State Police & Former State Director, New Jersey Office of Emergency Management

Thomas J. O'Reilly

Executive Advisor to the Center on Policing at Rutgers University

About the Advancing Public Safety Information Technology Program

The new Advancing Public Safety Technology Professional Development Program will offer courses targeting executives, operational managers, and IT project managers using expert instructors from operational agencies and industry. The program will offer continuing education credits from Rutgers University and attendees will also receive a certificate of completion. In the courses, participants will benefit from technology experts from industry solution providers (no sales efforts are allowed), experienced law enforcement practitioners, academic experts on technology implementation, and government leaders knowledgeable about programs.
