Where recreation agencies are located in multiple counties, the highest rate shall apply. For counties not listed above as examples, the SRA shall contact the DPRA Chairperson for salary standards for their county.

NOTE: These salary standards are computed by taking salary data for each specified position from the most recent published IPRA / HR Source Park & Recreation Compensation Survey based on “Total Responses” per the “Weighted Average” categories and multiplied at 80% to determine a minimum base salary (80% is an HR industry standard salary guideline to determine a minimum salary range from the salary midpoint (Average)). Actual figures are updated each year.

*County Equalizing Formula for the most current year - A statewide equalizing formula, based on Illinois Department of Labor county prevailing wage rates, is used to insure equitable comparison among counties. The formula, based on a sample of six trades common to all counties in Illinois, shall establish a county’s average wage rate. The trades included in the sample are Carpenter (all), Electric Power (Lineman), Operating Engineer #1 (Bldg.), Painter (all), Plumber (Bldg), and Truck Driver #1 (all). The percentage of deviation from the benchmark county’s average wage rate is applied to the designated sample positions to determine equalized county park and recreation minimum salary standards. Actual figures will vary slightly each year.
