Full Competency Framework
Introduction

The Management Consulting Competency Framework defines the competences and standards for management consultants, and forms the basis of the IMC USA’s Certified Management Consultant™ qualification (CMC®). The competences presented herein set forth the knowledge, skills and behaviors required of successful management consultants. There are three levels of progression covered in the framework—Early, Advanced, and Professional Leader, all underpinned by professional behaviors and ethics.

In 2015, the IMCUSA Board of Directors agreed to adopt the ICMCI 2014 Competency Framework as the IMC USA Framework rather than maintain a separate IMC USA Framework. The ICMCI Competency Framework represents the work of ICMCI Professional Standards and Quality Assurance committees with members from all over the world begun in the late 1990s and carried forward to today. This action will allow IMC USA to focus on moving the global standard forward and meeting that standard.

The CMC® qualification is relevant for all practicing consultants to management, including those in large and medium-sized firms, niche firms, specialty consultants, internal consultants, networked groups, and independent consultants, and will continue to remain a core offering of the Institute of Management Consultants USA. It defines the standards to be met by “fully competent consultants” and broadly speaking, is targeted at those consultants who:

- Are currently active in consulting: able to demonstrate that in three of the last five years management consulting has been a significant part of his or her activity. This can include consulting with clients; selling, managing and / or supporting consulting activity; preparing for and teaching consultancy; publishing and writing on consulting, technical specialties, client business segments, and related topics
- Have at least a Bachelor’s Degree or two additional years consulting experience with documented professional development
- Are experienced in all elements of the consulting life cycle;
- Can take full ownership for delivery of a project or a major work stream;
- Have experience in managing others; and
- Have demonstrated their contribution is highly valued by clients.

IMC USA wishes to acknowledge all of the previous original and derivative work by ICMCI members and IMC USA members which has resulted in this document.

**Full Competency Framework**
A Competence Based Professional Qualification for Individual Consultants

The Institute of Management Consultants USA believes in a sector-wide definition of the term “management consulting”:

“Management consulting is the providing to management of objective advice and assistance relating to the strategy, structure, management and operations of an organization in pursuit of its long-term purposes and objectives. Such assistance may include the identification of options with recommendations; the provision of an additional resource and/or the implementation of solutions.”

The Competency Framework

The IMC USA Competency Framework defines those competencies required to be a successful management consultant. The competences are the behaviors, skills and knowledge that a management consultant is expected to understand, apply and demonstrate. IMC USA’s Competency Framework is built upon the Common Body of Knowledge and the core competencies described in this document, both of which are aligned with ICMCI’s requirements for reciprocity of the CMC with other affiliated IMC organizations.

An effective Management Consultant requires a balance of behaviors, skills and knowledge:

- **Business and Technical Competence**
  This is the application of fact-based knowledge of technical skills, business understanding, sector insight, and external awareness.

- **Consulting Competence**
  These are the core consultancy skills, tools, and techniques which are essential in delivering consulting services.

- **Values and Ethical Behavior Competence**
  These define the professional skills, behaviors, and attitudes which act as “enablers” in achieving market capability, knowledge and Consulting Competence. They establish the level of ethical best practices, credibility and trust between the client and the consultant.
