

The First Fully-Automated Vaccine Storage and Handling System that Manages Inventory, Reporting and Ordering for You.

AccuVax : Efficient and Effective Handling of Vaccine.

- Provides assurance that vaccine is at optimal potency when administered
- Improves record keeping accuracy and saves time

Consistent, Accurate Temperature Management

- 10 temperature sensors recording and logging 24/7 -- eliminates hot/cold spots
- Stores vaccine at the exact temperature needed, whether refrigerated or frozen
- Fully enclosed unit protects against temperature excursions, even during power outages

Built-in Power Backup

- Battery provides at least 12 hours of coverage in case of power failure
- 99% of power outages in the US which are shorter than 8 hours
- Provides time to implement emergency plans if necessary

Stock Rotated Automatically

- Ensures doses nearest to expiry are used first, with no time spent on manual stock rotation
- Automatically tracks lot-code and expiration date

Inventory Reporting Instantly

- Full reporting and analytics: inventory, usage patterns, VFC or non-VFC doses
- Helps decision making on inventory levels; tracks VFC doses separately, generates reports

Ordering Your Way

- Automated re-ordering (optional), or low inventory prompt
- Customizable ordering compatible with your current process, or fully automated through electronic data transfer

Proactive Alerting Suite

- Avoid product expiration, stock depletion, temperature excursion
- Instant notification of battery activation
- Alerts sent via text and email

Remarkably Cost-Effective and Simple to Use

- Intuitive touch screen interface
- No time-consuming training needed, you will be up and running on day-1

Technical Specifications:

- **Capacity:** 684 refrigerated doses, 72 frozen
- **Size:** 28" wide, 28" deep, 54" high
- **Communications:** LAN, Wi-Fi or Cellular
- **HIPAA compliant**
- **Integrated Bar Code reader**
- **Secure access:** fingerprint log-in
