

CRUYWAGEN-IRMSA RISK LABORATORY

12 JULY JOHANNESBURG - 20 JULY CAPE TOWN - 07 AUGUST DURBAN

NOT ON MY WATCH!

What you can expect

South Africa 2018 and beyond remains an uncertain place for business, organisations and individuals and it is clear, as we look at the challenges that we all are facing, that robust conversations are needed, and at this time transparency and clarity is a must. If risk management is properly embedded within an organisation and a strong risk management culture adopted, we will see more organisations being able to maintain stability during times of difficulty and seize the 'opportunities' that come their way to prosper.

The number of risks that have materialised over the past 18 months and considering how many of those risks were highlighted since 2015, is indicative that knowledge of the risks is not enough. IRMSA believes that the future risk professional must shift the focus from just being risk process facilitators to becoming translators of data into workable risk information that leads to action! ..but even more is required. Risk managers should be "the ultimate

integrators” of strategic and business risk information and influencing leadership on how to best respond to uncertainty - to deal with the future!

The Risk Lab is focused on providing risk practitioners insights and guidance on how to develop and increase its predictive capability; scenario building and taking up the role of mind-changers that influence leadership and embrace the benefits that big thinking can offer risk management.

Programme		
<p>Cruywagen-IRMSA Risk Laboratory</p> <p>NOT ON MY WATCH</p> <p>Johannesburg: 12 July Cape Town: 20 July Durban: 7 August</p>		
Session	Topic	Speakers
