Re: Vermont IRP Fee Changes

The State of Vermont has passed legislation that increases truck registration fees to include those registered through IRP. The attached fee schedule reflects the new fee changes for the State of Vermont; it has been prorated and broken down by weights. Please make the necessary changes within IRP, Inc., to include the IRP website and notifying all foreign jurisdictions of this increase.

Please note when updating the fee schedule that 80,000 pounds is the maximum weight limit in Vermont unless the carrier is a milk hauler in which case they can register at 90,000 pounds.

The new fees will go into effect on July 1, 2016.

If there are any questions from other jurisdictions about these IRP Fee changes please contact:
