

VIRGINIA MOTOR CARRIER SERVICES

International Registration Plan

Fee Schedule Updates

December 1, 2018

Effective immediately, the Department of Motor Vehicles (DMV) is submitting a request for changes to our current fee schedules. DMV has made the business policy change to allow tow trucks to be included in apportioned registration.

In addition, during a review of the current fee structure it was concluded that a change to the registration fees used in bus calculations is required. Buses now have fee schedules based on the use (private or for-hire).

We understand that IRP member jurisdictions are granted 120 days to make the changes. Therefore, these changes should be implemented by April 1, 2019. If your jurisdiction is able to implement sooner please do not hesitate to make the change.

Please replace the current fee schedule for Virginia with the one attached.
