RE: Clarification on April 2018 Update to Washington IRP Fees

After contact with several jurisdictions, Washington wishes to clarify and submit a corrected fee chart to IRP, Inc. and IRP Member Jurisdictions to remove a clerical error and prevent additional confusion on the previously submitted changes.

While both the memo as well as the calculations and notes described that the additional fee types applied to all vehicle types, other information incorrectly omitted the BUS vehicle type from the chart. Washington would like to clarify that the fee changes apply to all vehicle types, **including BUS** vehicles.

We have made the following corrections to the fee charts presented with this clarification:

- Update all occurrences of “BS” vehicle type to “BU” vehicle type
- Include “BU” vehicle type in the LNG/CNG/Propane Weight Fee chart vehicle types
- Include “BU” vehicle type in the LNG/CNG/Propane License Fee chart vehicle types
- Update references in calculations to “BU” vehicle type where appropriate

We appreciate the communication from other jurisdictions with questions, and hope that this update provides the clarification requested. We ask that jurisdictions integrate this adjustment if not already included in the changes sent previously this year.

Please feel free to contact me with any questions.
