Please be advised that due to the declaration of a Public Health Emergency, all Access Prince Edward Island Offices will be closed until March 30, when they are slated to reopen with a new service model that will protect clients and staff, while mitigating the risk of a long term closure.

With this in mind, the PEI Department of Transportation, Infrastructure and Energy is issuing a 60 day extension to driver license and vehicle registration expiries to alleviate issues for drivers until we can return to a normal service level.

The following message is being communicated to the public via media and the Department's website.

"Due to the Public Health Emergency, all expired and expiring PEI Driver Licenses, Voluntary ID Cards and Vehicle Registration Permits that are eligible for renewal are being extended by 60 days up to June 1, 2020. If required, further extensions will be made."

It is critical that this note is shared with all of our enforcement partners so as to not have a negative effect on the movement of goods by commercial drivers during this time period.

Interested parties can confirm the note on the Department website at the link below.
