Xun Xu

Dr. Xun Xu is the President and chief scientist of BGI-Research. Dr. Xu is also nominated as Vice-Chairman of International Organization for Standardization/Biotechnology Committee ISO/TC276, and Director-at-Large-China of International Society for Biological and Environmental Repositories (ISBER) in 2018-2021.

Facing the new global challenges, biobanks in China provide firm support to the research and clinical community with our expertise in sample tracking, biospecimen processing, and regulatory compliance. Dr. Xu will continue to encourage broad engagement of different professionals, build links with wider communities such as those in agriculture, forestry, food industry, data processing, etc., so as to enhance ISBER’s visibility and influence in China.
