Memorandum of Understanding between ISCoS and ESPRM

- Overall objective: This MoU serves as a framework agreement for cooperation between ISCoS and ESPRM to develop and implement joint activities that support and further strengthen the shared mission.
- Scope of collaboration: There is a recognition of the need to coordinate efforts and pool resources for training and support by respective international organisations and regional groups of SCI professionals.
- Among other objectives to be actioned through the MoU was **the development of an international Autonomic Dysreflexia (AD) Medical Emergency Card.**
