ISPO 2013 World Congress
Inclusion, Participation & Empowerment
4th - 7th February 2013
HICC, Hyderabad - India
The Knud Jansen Lecture 2013.
“Standing on the shoulders of giants”.
Carson Harte.
“If I have seen a little further it is by standing on the shoulders of Giants” (Isaac Newton)
76-81 Strathclyde

81-93 Musgrave Park Hospital, Belfast

91-93 Cappagh Hospital, Dublin
Planning and Curriculum.

• Stakeholders
• Government
• NGOs
• Common purpose
The Cambodia Trust

Better future for people with disabilities.
The players.

- VVAF Jaipur
- Handicap International. Wood and Leather
- Cambodia Trust, Recycled components.
- FSUN. Foam and Aluminium
- ICRC. AmRC. Polypropylene
Passion sometimes is inversely proportional to expertise?

The need for sustainability brought consensus

Education and training
OUTCOME

• Orthotics should be in the plan.
• Three year training
• National agreement on technology
• Stakeholders would “own” the school.
• Concerns over education standards

• Compromise

• Excellent progress in three years

• Consultation with ISPO

• Recognition, 1998
What did we learn

• Like shoveling steam or herding cats.
• Common purpose
• Collaboration
• Peer reviewed standards were key
• Education and training
• Technology is important, but not a deal breaker
Definitions.
Category I and II. Clinicians
Category III Technicians.
Modular approach

Recognition
15 Category I
11 Category II
STRATEGY.
Accreditation and recognition
Initially regional and international teachers
Local training of trainers in partnership
Hand over

Ten year plan PIPE Project In, Project Exit
Five years investment, five years ramping down
- SLSPO
- MoH
- Ragama
- Year 8
- Government employment
- NGO employment
JSPO

- MOH
- Advocacy
- First 27 graduates
- 24 employed
- Indonesia needs six more
Government Support & Legislation

- Accreditation and oversight of the program by the authorities is good - CHED
- Current status of the program within the University is excellent.
- For the 2 year (Category III) segment of the program, the plans for TESDA recognition seem to be in place.
- The implementation of a licensing exam appears to be challenging as a professional body is required for this to take place.
- A discussion around implementing a one year post graduate internship should continue and hopefully become a reality. This would also support the move to having proper regulation/law in place.
• Planning matters
• Strategy matters
• Basing the planning on the body of knowledge matters.
• Working with Internationally agreed standards matter
• Partnerships and relationships matter
University of Medical Technology Yangon
• First
• Audited quality
• Continuous improvement
• Transferability
• Confidence
Standards setting
1995. Phnom Penh
Functional
Cosmetically acceptable
Affordable and accessible
Biomechanically sound
Trained staff

Echoing in the UNCRPD
Consensus

• Wheelchairs
• Lower Limb Orthotics
• Stroke Management
• Cerebral palsy
• Diabetic Foot
• Amputation surgery
• Wheelchairs
World Health Organization

- Wheelchairs.
- P&O Training
- Rehabilitation services
- CBR
- World Report

- The power of partnership, working together
Successful marketing (ish)

• Victims assistance
• Too complex
• Didn’t deliver long term
When marketing goes wrong

- Disability not mentioned
- Check list mentality
Landmines / other causes

Services to non amputees
Lack of data
The need for better data
A new opportunity

- New language
- Assistive devices
- Accessibility
- Quality
- Training of experts
- International Collaboration
- Research

- Back it up
ISPO Standards

• They go some way to addressing the issues
• They are NOT mandatory
• ISPO is not a police man
• ISPO external review is a USEFUL LEVER

• Cambodia Trust and many others have found the standards and the review to be effective
• Agendas are shifting
• Social Model is on the rise
• Medical model is waning

• We overcome barriers
• Better designed research
• Better technology
• More trained people.
• More schools and programs using the standards
• Encourage the expert user
• Educate the resource holders
• Better Marketing
• Make standards work for you
The Cambodia Trust and CSPO wish you all the best and a Happy New Year.

You have shared our 2012 success. With our sincere respect and appreciation, we gratefully thank you for your support and wonderful collaboration during 2012.

Wishing you a Merry Christmas and a Happy 2013

The Cambodia Trust Staff and CSPO Students
• Education: Standards further developed
• Technology: Differentiated
• Research: Focused by professional on real issues
• Development: seeking partnerships with business
• Changing the image: Marketing
• Looking for new markets that are private, NGO and State, changing service delivery
• Resources: engaging with the power brokers, UN, WHO,
