

ENJOY MADRID

Madrid is an exciting city offering plenty of activities.

Orto Medical Care will take place at the perfect moment to visit the city. In the autumn months Madrid is particularly welcoming with its comfortable climate and many hours of sunshine, and you are sure to enjoy its blue skies inviting you to step out and take a stroll. Autumn is the perfect time to explore the city, amble around its parks tinged with red and ochre, sample fantastic cuisine or check out the cultural and entertainment programme of one of Europe's most vibrant capital cities.

TRADE SHOW

Orto Medical Care is the most important trade fair in Southern Europe. An excellent platform to showcase orthopaedics, technical aids and support products for the elderly.

Many companies around the world trust its international prestige, year after year.

Taking part in the OMC fair is a perfect opportunity to boost business relations and attract new customers, develop and increase sales and generate new business opportunities. This is an event that focuses on innovation, new technologies and the firm's efforts to offer increasingly ambitious solutions in order to improve the users' quality of life.

GROWING MARKET

The orthopaedics sector is constantly growing in southern Europe, sales in both technical aids, orthotics, prosthetics and services for the elderly reach record numbers year after year.

Spain has more than 9.5 million retirees, a figure that grows every day because our country hosts thousands of retirees from all over Europe. Therefore the services dedicated to this sector grow accordingly.

SPAIN IS THE MOST POPULAR DESTINATION FOR RETIREMENT

Sales in orthopaedics, technical aids and products for the elderly have grown around 3% over the last 2 years in Spain

CONGRESS

The OMC congress will be organised in collaboration with the International Society for Prosthetics and Orthotics (ISPO) with the aim of offering the congress participants an overview of the latest developments in orthotics and prosthetics to improve the quality of life of the user. After the sessions, practical workshops will be offered by the main exhibitors of the trade fair.

25th October - Innovation in Prosthetics and Orthotics: Exponential Progress Becomes Reality.

Elena García Armada - Creator of the world's first pediatric exoskeleton.

Jon Vallecillo Lazcano - 3D, a new manufacturing method in orthopaedics.

Jempi Wilssens - Design and manufacture of 3D impression orthoses.

Horst-Heinrich Aschoff - The Endo - Exo - Prosthetics - about a transcutaneous osseointegrated device for rehab following limb amputation.

Frederic Esteve Naya - Cheneau Corset. Biomechanical principles.

26th October - Prosthetics: Advancing Knowledge to improve the user's quality of life

Karl Becker - Innovative impression system for orthopaedic technology.

Marlo Ortiz - Ischial-Ramus containment in transfemoral socket designs.

Michael Schäfer - Future Perspectives and Challenges in upper and lower limb prosthetics.

Thomas Schmalz. *To be confirmed
