NAME OF PROJECT – WHO 4th International Standard for Streptokinase
Subcommittee: Fibrinolysis

- Person responsible (Chair / Principal Investigator): Craig Thelwell

- Aim / Mandate of the project: To calibrate a replacement for the WHO 3rd International Standard (IS) for Streptokinase (00/464).

- Methodology (in very brief, not more than 1 paragraph): An international collaborative study to calculate potency estimates for candidate reference preparations against the 3rd IS, using chromogenic and fibrin-based assay methods.

- Inclusion / recruitment criteria (if applicable): Participants in the study will be experienced laboratories from industry, academia and regulatory organisations with established in-house methods.

- Year of starting: 2014

- Annual report of project: As required

- Year of completion (expected): 2016
